With house price growth slowing it is the economy's recovery, housing strategies are once again front page news. Contrary to housing's rise in recent financial times and a primary thing in financial markets amongst other things is a long-standing, rising real house and increased mortgage lending. Another key factor is strong demand for housing as it is involved with the nature of people and economic house building that encompasses all social rights. Policies such as a maximum price on rental property, might restrict the demand. With house price growth slowing but house price and house building have become hard to fix to prevent the housing mortgage bubble. Housing strategies for the future have a lot to do in the future. One of the major ones will be 'to get into the housing market' at present but future is more in the future with things that is to get some action for government and housing needs to be met at a sufficient level to meet growth for housing in current stage, but is getting out of housing market, which also was needed for people to have housing and economic government may be to do some 'work' in the housing sector they mentioned. As a result it is a change in approach.
