

### Issue Spotting a Contracts Law Question

I. Did the traders form a contract?

a. Rule: A K is a legal status

b. Was there an offer?

- i. An offer creates a power of acceptance in the offeree. To be valid, an offer must be: (1) an expression of promise, undertaking, or commitment to enter into a K; (2) definite and certain in its terms (identification of offeree and definiteness of subject matter); and (3) communicated to the offeree

c. Was the offer an invitation to bargain in the bilateral mode or in the unilateral mode?

- i. In a bilateral K, the offeree accepts by promising to do a stipulated act
- ii. In a unilateral K, the offeree accepts by performing a stipulated act. The offeree of a unilateral K must act w/ knowledge of the offer and be motivated by it

d. Was there a valid acceptance?

- i. General rule: An offer to bargain in the unilateral mode can only be accepted by total completion of the requested act
- ii. Exception: Once the offeree begins the substantial performance of the requested act, he does n/ form the K but he does cut off the power of the offeror to revoke so as to give the offeree a reasonable opportunity to complete that which he has begun.

e. Was there consideration (bargained for legal detriment on both sides of the exchange)?

- i. Was there a promise to perform an act which, but for this bargain, the offeree was n/ legally obligated to perform?

**How to Do Your Best on Law School Exams** John Delaney, 1988      *Exam Strategy Fundamentals* Harrison

Stewart, AI, 2025-04-07 Exam Strategy Fundamentals offers a strategic guide to help law students excel on exams focusing on practical skills rather than complex legal theory. It addresses a common problem students understand the law but struggle to demonstrate that knowledge effectively under exam conditions. The book emphasizes mastering essential skills like issue spotting and the IRAC method (Issue Rule Analysis Conclusion) enabling students to improve legal reasoning and overall exam writing. The book uniquely provides actionable strategies including time management techniques and efficient outline creation crucial for success. This textbook uses real world examples from law school exams incorporating insights from professors and successful students. By blending cognitive psychology principles with effective writing strategies, the book provides a holistic approach to exam preparation applicable to both law school and early legal careers. Exam Strategy Fundamentals progresses logically starting with foundational concepts like issue spotting and the IRAC method then moves to practical time management and outline strategies and concludes with approaches for tackling common exam variations.

**The Handbook of Rationality** Markus Knauff, Wolfgang Spohn, 2021-12-14 The first reference on rationality that integrates accounts from psychology and philosophy covering descriptive and normative theories from both disciplines. Both analytic philosophy and cognitive psychology have made dramatic advances in understanding rationality but there has been little interaction between the disciplines. This volume offers the first integrated overview of the state of the art in the psychology and philosophy of rationality. Written by leading experts from both disciplines, The Handbook of Rationality covers the main normative and descriptive theories of rationality: how people ought to think, how they actually think, and why we often deviate from what we can call rational. It also offers insights from other fields such as artificial intelligence, economics, the social sciences, and cognitive neuroscience. The Handbook proposes a novel classification system for researchers in human rationality and it creates new connections between rationality research in philosophy, psychology, and other disciplines. Following the basic distinction between theoretical and practical rationality, the book first considers the theoretical side including normative and descriptive theories of logical, probabilistic, causal, and defeasible reasoning. It then turns to the practical side discussing topics such as decision making, bounded rationality, game theory, deontic and legal reasoning, and the relation between rationality and morality. Finally, it covers topics that arise in both theoretical and practical rationality including visual and spatial thinking, scientific rationality, how children learn to reason rationally, and the connection between intelligence and rationality.
