

Literature Review

There are different ways to structure a literature review; refer to your unit outline to identify any faculty guidelines.

'Literature' covers everything relevant that is written on a topic, including: books, journal articles, newspaper articles, historical records, government reports, theses and dissertations. Check with your unit convenor or supervisor when in doubt.

What is the purpose of a literature review?

A literature review is a description of the literature relevant to a particular field or topic. It is often an examination of what research has already been done in an area to identify where further research could be conducted. It therefore helps you determine the nature and reason for further research.

In undergraduate courses, unit convenors often set literature reviews to encourage you to read broadly so as to develop a deep understanding of your subject area. You need to read the literature thoroughly so you can think critically about the literature and the relevancy of the research.

The literature search

Before you start searching, it is effective practice to create a search strategy. This should include identifying keywords, and synonyms of those keywords, for typing into the search box of the search tool you are using. Some useful places to search for the literature include:

- unit readings and references
- reference lists in key textbooks and recent journal articles
- UCanFind, the Library's search tool
- Library Subject Guides for a list of databases and resources that are relevant to your subject area (<http://canberra.libguides.com/>)
- The Library page "Databases A-Z" for a list of all of the databases to which the library subscribes (<http://www.canberra.edu.au/library/research-gateway/databases>).

It is important to remember that you will not find all the literature you need in one simple search. For a comprehensive search use different combinations of search terms, across multiple search tools. Before reading in-depth, skim and scan the literature to determine whether it is relevant to your topic.
