Forensics in Chemistry Sara McCubbins, Angela Codron, 2012 Forensics seems to have the unique ability to maintain student interest and promote content learning I still have students approach me from past years and ask about the forensics case and specific characters from the story I have never had a student come back to me and comment on that unit with the multiple choice test at the end from the Introduction to Forensics in Chemistry The Murder of Kirsten K How did Kirsten K's body wind up at the

bottom of a lake and what do wedding cake ingredients soil samples radioactive decay bone age blood stains bullet matching and drug lab evidence reveal about whodunit These mysteries are at the core of this teacher resource book which meets the unique needs of high school chemistry classes in a highly memorable way The book makes forensic evidence the foundation of a series of eight hands on week long labs As you weave the labs throughout the year and students solve the case the narrative provides vivid lessons in why chemistry concepts are relevant and how they connect All chapters include case information specific to each performance assessment and highlight the related national standards and chemistry content Chapters provide Teacher guides to help you set up Student performance assessments A suspect file to introduce the characters and new information about their relationships to the case Samples of student work that has been previously assessed and that serves as an answer key for you Grading rubrics Using Forensics in Chemistry as your guide you will gain the confidence to use inquiry based strategies and performance based assessments with a complex chemistry curriculum Your students may gain an interest in chemistry that rivals their fascination with Bones and CSI

Supporting the Whole Child: Reflections on Best Practices in Learning, Teaching, and Leadership Marge

Scherer,2009-11-23 This e book a collection of articles from Educational Leadership and other ASCD publications explores what it means to support the whole child In these articles authors ponder the various meanings of support in the classroom school and community This third in a four book series exploring whole child education ends by emphasizing another maxim of good teaching Hold high expectations for your students Our authors agree With the right supports students are capable of doing more than even they think they can *Intellectual Creativity in First-Year Composition Classes* Heidi Wall

Burns,Michael MacBride,2016-10-12 Today s first year composition classrooms are largely reflective of the writing pedagogy that has been used for the last 200 years Unfortunately this methodology does not meet the research or writing needs of today s college and university students Burns and MacBride were determined to make their first year composition courses more relevant to their students and sought a way to revolutionize their syllabus to do so Building on the work of Tom Romono Nancy Mack Camille Allen Sirpa Grierson Melinda Putz and others Burns and MacBride set out to determine if a multigenre research project could better teach their students research writing and critical thinking skills than a traditional research based essay The findings of their semester long study indicated that not only does a MGRP teach these skills but it far surpasses a traditional essay in teaching engagement intellectual creativity and transferable writing skills Burns and

MacBride demonstrate two different ways to integrate a multigenre research project into the college composition classroom

Integrating Discovery-Based Research into the Undergraduate Curriculum National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Division on Earth and Life Studies,Committee for Convocation on Integrating Discovery-Based Research into the Undergraduate Curriculum,2015-12-07 Students who participate in scientific research as undergraduates report gaining many benefits from the experience However undergraduate research done independently under a faculty member s guidance or as part of an internship regardless of its individual benefits is inherently limited in its overall impact Faculty members and sponsoring companies have limited time and funding to support undergraduate researchers and most institutions have available or have allocated only enough human and financial resources to involve a small fraction of their undergraduates in

such experiences Many more students can be involved as undergraduate researchers if they do scientific research either collectively or individually as part of a regularly scheduled course Course based research experiences have been shown to provide students with many of the same benefits acquired from a mentored summer research experience assuming that sufficient class time is invested and several different potential advantages In order to further explore this issue the Division on Earth and Life Studies and the Division of Behavioral and Social Sciences and Education organized a convocation meant to examine the efficacy of engaging large numbers of undergraduate students who are enrolled in traditional academic year courses in the life and related sciences in original research civic engagement around scientific issues and or intensive study of research methods and scientific publications at both two and four year colleges and universities Participants explored the benefits and costs of offering students such experiences and the ways that such efforts may both influence and be influenced by issues such as institutional governance available resources and professional expectations of faculty Integrating Discovery Based Research into the Undergraduate Curriculum summarizes the presentations and discussions from this event
