Information Technology for Librarians and Information Professionals , Jonathan M. Smith, 2021-03-25 This comprehensive primer introduces information technology topics foundational to many services offered in today's libraries and information centers. Written by a librarian, it clearly explains concepts familiar to the IT professional with an eye toward practical applications in libraries for the aspiring technologist. Chapters begin with a basic introduction to a major topic, then go into enough technical detail of relevant technologies to be useful to the student preparing for library technology and systems work or the professional needing to converse effectively with technology experts. Many chapters also present current issues or trends for the subject matter being discussed. The twelve chapters cover major topics such as technology support, computer hardware, networking, server administration, information security, web development, software and systems development, emerging technology, library management technologies, and technology planning. Each chapter also includes a set of pedagogical features for use with instruction, including Chapter summary, List of key terms, End of chapter question set, Suggested activities, Bibliography for further reading, List of web resources. Those who will find this book useful include library information science students, librarians new to systems or information technology responsibilities, and library managers desiring a primer on information technology.

Information Technology Investment: Decision-making Methodology (2nd Edition) Marc J. Schniederjans, Jamie L. Hamaker, Ashlyn M. Schniederjans, 2010-03-24 From the individual to the largest organization, everyone today has to make investments in IT. Making a smart investment that will best satisfy all the necessary decision-making criteria requires careful and inclusive analysis. This textbook provides an up-to-date, in-depth understanding of the methodologies available to aid in this complex process of multi-criteria decision-making. It guides readers on the process of technology acquisition, what methods to use to make IT investment decisions, how to choose the technology, and justify its selection, and how the decision will impact the organization. Unique to this textbook are both financial investment models and more complex decision-making models from the field of management science so that readers can extend the analysis benefits to enhance and confirm their IT investment choices. The wide range of methodologies featured in the book gives readers the opportunity to customize their best-fit solutions for their unique IT decision situation. This textbook is especially ideal for educators and students involved in programs dealing with technology management, operations management, applied finance, operations research, and industrial engineering. A complimentary copy of the Instructor's Manual and Test Bank and the PowerPoint presentations of the text materials are available for all instructors who adopt this book as a course text. Information Systems Outsourcing Rudy Hirschheim, Armin Heinzl, Jens Dibbern, 2014-08-12 This book attempts to synthesize research that contributes to a better understanding of how to reach sustainable business value through information systems (IS) outsourcing. Important topics in this realm are how IS outsourcing can contribute to innovation, how it can be dynamically governed, how to cope with its increasing complexity through multi-vendor arrangements, how service quality standards can be met, how corporate

social responsibility can be upheld and how to cope with increasing demands of internationalization and new sourcing models such as crowdsourcing and platform based cooperation These issues are viewed from either the client or vendor perspective or both The book should be of interest to all academics and students in the fields of Information Systems Management and Organization as well as corporate executives and professionals who seek a more profound analysis and understanding of the underlying factors and mechanisms of outsourcing
