Thompson,Ruth F. Chadwick,2007-07-23 It is difficult to

think of an example of an advancement in the biological sciences that has had an impact on society similar to that of the new genetics Recent developments in biotechnology have occasioned much discussion among academics professionals and lay people alike In particular many questions and concerns have arisen over the acquisition access and control of genetic information There are several reasons why the new genetics has commanded such widespread attention and why it is now

the subject of considerable debate Special reference is given in this volume to the implications of genetic information for five different subject areas eugenics the insurance industry the commercialisation of genetic testing strategies for raising public awareness and the value of theoretical ethical and sociological frameworks in the debate This diverse collection of papers attempts to address and critically discuss issues surrounding the control of and access to genetic information from ethical medical legal and theoretical points of view The first and shortest section of the book attempts to address concerns over the eugenic potential of new biotechnologies It also provides a historical context for the debate for controversy over the subject of eugenics predates the current debate over genetic information by a considerable length of time Indeed by the time the first patent was issued for Chakrabarty's strain of oil eating bacteria in the early 1970s the term eugenics had already acquired strong pejorative connotations

could be postulated however the experiences are not structured enough and it is difficult to extract from them useful guidelines for avoiding future problems Generally speaking there is a trend to find the root of the problems in the technology itself and in its adequacy with the preexistent technological context Technocratic technology transfer models describe the problems in terms of these aspects Although it is true that those factors limit the probability of success there is another source of explanations linked to the individuals and working teams and how they perceive the technology
