Handbook of Research on Political Activism in the Information Age Solo, Ashu M. G., 2014-05-31

Technology and particularly the Internet has caused many changes in the realm of politics. Mainstream media no longer has a monopoly on political commentary as social media blogs and user-generated video streaming sites have emerged as an outlet for citizens and political activists to openly voice their opinions, organize political demonstrations, and network online. The **Handbook of Research on Political Activism in the Information Age** includes progressive research from more than 39 international experts at universities and research institutions across 15 different countries. Each of the 25 scholarly chapter contributions focus on topics pertaining to the application of information technology, engineering, and mathematics to political activism. Through its analysis of the methods for political activism in the information age, the effectiveness of these methods, as well as emerging analytical tools, this book is designed for use by researchers, activists, political scientists, engineers, computer scientists, journalists, professors, students, and professionals working in the fields of politics, government, media, and communications, and Internet marketing.

Hacking Dominik Landwehr, 2014-10-02. Seit der Popularisierung der Computertechnologie durch Personal Computer und Internet hat die Strategie des Hackings eine besondere Faszination auf die Medienkunst ausstrahlt. Warum ist das so? Welche Botschaften vermitteln die Künstler mit diesen Projekten? Der zweite Band der Reihe **Edition Digital Culture** geht diesen Fragen auf den Grund. Ein Hack ist eigentlich eine gewitzte Lösung für ein Computerproblem. Hacken steht aber auch für das kreative Aufbrechen einer Technologie und den damit verbundenen Systemen. Ein Hacker will mehr als nur vorgegebene Regeln befolgen; er will die Systeme selbst verändern. Das macht die Figur des Hackers und seine Tätigkeit schillernd und mehrdeutig. Mit Texten von Hannes Gassert, Verena Kuni, Claus Pias, Felix Stalder und Raffael Dorig.

Cultural Ideals of Home Deborah Chambers, 2020-03-18. Spanning the nineteenth to twenty-first centuries, this book investigates how home is imagined, staged, and experienced in western culture. Questions about meanings of home and domestic culture are triggered by dramatic changes in values and ideals about the dwellings we live in and the dwellings we desire or dread. Deborah Chambers explores how home is idealised as a middle-class haven, managed as an investment and signified as a status symbol and expression of personal identity. She addresses a range of public, state, commercial, popular, and expert discourses about home: the heritage industry, design exhibitions, television, social media, home mobilities, and migration, smart technologies, and ecological sustainability. Drawing on cross-disciplinary research including cultural history and cultural geography, the book offers a distinctive media and cultural studies approach supported by original, historically informed case studies on interior and domestic design, exhibitions of model homes, TV home interiors, media home imaginaries, multiscreen homes, corporate visions of homes of tomorrow, and digital smart homes. A comprehensive and engaging study, this book is ideal for students and researchers of cultural studies, cultural history, media and communication studies, as well as sociology, gender studies, cultural geography, and design studies.
