**TMS 2015 144th Annual Meeting & Exhibition, Annual Meeting Supplemental Proceedings** The Minerals, Metals & Materials Society (TMS), 2016-12-20 Market Issues and Prospects for U. S. Distillers' Grains Supply, Use, and Price Relationships Linwood A. Hoffman, 2011-04 Growth in corn dry mill ethanol production has surged in the past several years simultaneously creating a co product distillers grains DDGS Many in the U S feed industry were concerned about the size of this new feed source and whether it could be used entirely by the feed industry but they also worried about the price discovery process for the product Provides a transparent methodology to estimate U S supply and consumption of DDGS Potential domestic and export use of U S DDGS exceeds current production and is likely to exceed future production as ethanol production continues to grow Identifies the DDGS price discovery process along with the price relationships of distillers grains corn and soybean meal Illus A print on demand report Branching and Rooting Out with a CT Scanner: The Why, the How, and the Outcomes, Present and Possibly Future Pierre Dutilleul, Jonathan A. Lafond, 2016-04-13 Until recently a majority of the applications of X ray computed tomography CT scanning in plant sciences remained descriptive some included a quantification of the plant materials when the root soil isolation or branch leaf separation was satisfactory and a few involved the modeling of plant biology processes or the assessment of treatment or disease effects on plant biomass and structures during growth In the last decade repeated CT scanning of the same plants was reported in an increasing number of studies in which moderate doses of X rays had been used Besides the general objectives of Frontiers in Plant Science research topics Branching and Rooting Out with a CT Scanner was proposed to meet specific objectives i providing a non technical update on knowledge about the application of CT scanning technology to plants starting with the type of CT scanning data collected CT images vs CT numbers and their processing in the graphical and numerical approaches ii drawing the limits of the CT scanning approach which because it is based on material density can distinguish materials with contrasting or moderately overlapping densities e g branches vs leaves roots vs non organic soils but not the others e g roots vs organic soils iii explaining with a sufficient level of detail the main procedures used for graphical quantitative and statistical analyses of plant CT scanning data including fractal complexity measures and statistics appropriate for repeated plant CT scanning in experiments where the research hypotheses are about biological processes such as light interception by canopies root disease development and plant growth under stress conditions iv comparing plant CT scanning with an alternative technology that applies to plants such as the phenomics platforms which target leaf canopies and v providing current and potential users of plant CT scanning with up to date information and exhaustive documentation including clear perspectives and well defined goals for the future for them to be even more efficient or most efficient from start in their research work *A Century of Geography at Stellenbosch University 1920-2020* Gustav Visser, Jan de Waal, 2020-09-28 A Century of Geography at Stellenbosch University 1920 2020 focuses on the establishment and development of geography as

an academic discipline at Stellenbosch South Africa's founding geography department. The ways in which the department currently operates are deemed fundamentally joined to its past and pave the way for the evolution of geography and its various subdisciplines going forward. The investigation seeks to highlight the development of the discipline and its institutionalisation as part of the academic offerings of the university while providing details about the teaching and research conducted as well as of the people who contributed to these endeavours. It also furnishes the academic geography community at Stellenbosch and geography more broadly with some insights into its past development and more recent changes along with a complete bibliography of conducted research.
