- Chrome-plated door handles with security locks
- 6 inch adjustable legs
- Stainless steel shelf supports
- Baked epoxy-coated shelves adjustable on 1 inch centers
- Magnetic door gaskets
- Adjustable doorstops

Approval : _____

SPECIFICATIONS

Cabinet - Cabinets are all metal, inside and out. The top, back, and bottom are made of galvanized steel. In addition, all seams are closed and sealed, with metal edges turned away from the exposed surface. The result is an integrated structural frame. Internal corners are covered to conform to NSF standards. Automatic interior lighting is controlled by a light switch concealed in the door hinge(s). The cabinet is supported on four 6 inch adjustable steel legs.

Doors - Constructed of metal, refrigerator doors are self-closing and fully insulated. Their cam-lift hinges are chrome-plated and self-lubricating. Hinges also have a safety stop that holds the door open, preventing overwing. Chrome-plated pull handles have built-in cylinder locks. The full-perimeter, magnetic vinyl gaskets are removable without the use of tools. Doors easily lift off, and door perimeters have a built-in, low wattage, and anti-condensate heater. Door openings are protected by an impact-resistant, nonconductive PVC

breaker strip with no exposed screws or fasteners.

Insulation - Cabinet body and doors are filled with pressure-injected polyurethane foam.

Interior Shelves - Two wire shelves per section are standard. Shelves have a runner spaced 3/8 inch O.C. with two reinforcing bars 8 1/2 inch O.C. Coated with 7 mils. of baked-on gray epoxy. The shelves have a saline spray corrosion resistance of 600 hours. They are supported on stainless steel pilasters, and are adjustable on 1 inch centers. All shelves are interchangeable and can be adjusted without tools or special parts.

Self-Contained Refrigeration - The complete refrigeration assemblies are mounted on top of the cabinet behind a removable hatch cover. Refrigeration components include two hermetically sealed compressors, the thermostatic expansion valves, thermostatic temperature controls, high-humidity evaporator coils. Dual Temp has hot gas

condensate pan. The refrigerator system is balanced to maintain 38°F average internal air temperature. The freezer system is balanced to maintain 0°F average internal air temperature. The air distribution system provides even air flow and temperature control throughout the cabinet. All components are factory installed and tested, and supplied with master power switches, and exterior digital thermometers.

Remote Cabinets - Standard remote units are provided with capped refrigeration lines, expansion valves, solenoid valves, electric condensate evaporators, and temperature control. Condensing units are not included. All other features are the same as self-contained units, except no power cord.
