**Ending Big Government** Michael Dahlen, 2016-02 Statism denotes any system of big government a government that gains power at the expense of individual freedom a government that uses its power to redistribute wealth and regulate the economy Laissez faire capitalism by contrast is the system of limited government the system of economic and political freedom It is a system that has created more wealth and lifted more people out of poverty than any other system Yet it is relentlessly demonized We are told that the free market is impractical prone to crises depressions and coercive monopolies Michael Dahlen dispels these and many other myths He shows that a laissez faire capitalist system is not only practical he shows that it is moral as it is the only system that recognizes each individual's inalienable right to his own life A provocative weave of history philosophy and political economy **Ending Big Government The Essential Case for Capitalism and Freedom** shows that capitalism is incontestably superior to statism

Semigroups of Operators - Theory and Applications Jacek Banasiak, Adam Bobrowski, Mirosław Lachowicz, Yuri Tomilov, 2020-06-12 This book features selected and peer reviewed lectures presented at the 3rd Semigroups of Operators Theory and Applications Conference held in Kazimierz Dolny Poland in October 2018 to mark the 85th birthday of Jan Kisy ski Held every five years the conference offers a forum for mathematicians using semigroup theory to discover what is happening outside their particular field of research and helps establish new links between various sub disciplines of semigroup theory stochastic processes differential equations and the applied fields The book is intended for researchers postgraduate and senior students working in operator theory partial differential equations

probability and stochastic processes analytical methods in biology and other natural sciences optimisation and optimal control The theory of semigroups of operators is a well developed branch of functional analysis Its foundations were laid at the beginning of the 20th century while Hille and Yosida's fundamental generation theorem dates back to the forties The theory was originally designed as a universal language for partial differential equations and stochastic processes but at the same time it started to become an independent branch of operator theory Today it still has the same distinctive character it develops rapidly by posing new internal questions and in answering them discovering new methods that can be used in applications On the other hand it is being influenced by questions from PDE's and stochastic processes as well as from applied sciences such as mathematical biology and optimal control and as a result it continually gathers new momentum However many results both from semigroup theory itself and the applied sciences are phrased in discipline specific languages and are hardly known to the broader community

*Proceedings of the International Conference Theory and Applications in the Knowledge Economy* Eduardo Tomé, 2016-07-08 Foreword TAKE 2016 is a dream that came true In about six months a group of friends and colleagues put together in an upcoming and very dynamic university a conference with 9 streams 3 keynotes and 3 special sessions 60 papers presented 6 posters and around 80 participants from 20 countries This is awesome I would like to deeply thank Aveiro University the GOVCOPP research centre the conference committee the keynote speakers the special session convenors the stream leaders the reviewers the authors and the administrative people for all their work and support I want to have two special words one for Blazenka Knezevic without whom the website would not have been possible the other for Gaby Neumann for work in these Proceedings Scientifically TAKE seems to be as important and new and far reaching We don't have shortage of models regarding the knowledge economy but we decisively lack to explore the relation between theory and practice TAKE is a step in exploring that difference We know that Exact sciences find the best answers and social sciences give the best questions J C Spender and we also know that Knowledge Management is more preached by scholars than done by practitioners Aino Kianto We assume the first idea and try to overcome the second Hopefully TAKE 2016 will be a great success Thank you for everything
