Multilingual Encounters in Europe's Institutional Spaces Johann Wolfgang Unger, Michał Krzyżanowski, Ruth Wodak, 2014

Multilingual Encounters in Europe's Institutional Spaces Johann W. Unger, Michał Krzyżanowski, Ruth Wodak, 2014-02-27 Multilingual encounters have been commonplace in many types of institutions and have become an essential part of supranational institutions such as the EU since their inception This volume explores and discusses different ways of researching the discursive dimension of these encounters and critically examines their relevance to policy politics and society as a whole This includes institutions at the local regional and supranational level Multilingualism in institutions is currently often seen as an obstacle rather than an opportunity at least with respect to European public and private spheres The volume asks exactly how is multilingualism conceptualized and talked about in different institutions how do different institutions deal with multilingualism both internally and externally what are the policy making rules and challenges for the future for various institutions with respect to multilingualism

An Introduction to Multilingualism Florian Coulmas, 2018 This book offers an introduction to the many facets of multilingualism in a changing world It begins with an overview of the multiplicity of human languages and their geographic distribution before moving on to the key question of what multilingualism actually is and what is understood by terms such as mother tongue native speaker and speech community In the chapters that follow Florian Coulmas systematically explores multilingualism with respect to the individual institutions cities nations and cyberspace In each of these domains the dynamics of language choice are undergoing changes as a result of economic political and cultural forces Against this background two chapters discuss the effects of linguistic diversity on the integration and separation of language and society before a final chapter describes and assesses research methods for investigating multilingualism Each chapter concludes with problems and questions for discussion which place the topic in a real world context The book explores where when and why multilingualism came to be regarded as a problem and why it presents a serious challenge for linguistic theory today It provides the basic tools to analyse different kinds of multilingualism at both the individual and society level and will be of interest to students of linguistics sociology education and communication studies

Linguistic Ethnography Fiona Copland, Angela Creese, 2015-01-22 This is an engaging interdisciplinary guide to the unique role of language within ethnography The book provides a philosophical overview of the field alongside practical support for designing and developing your own ethnographic research It demonstrates how to build and develop arguments and engages with practical issues such as ethics transcription and impact There are chapter long case studies based on real research that will explain key themes and help you create and analyse your own linguistic data Drawing on the authors experience they outline the practical epistemological and theoretical decisions that researchers must take when planning and carrying out their studies Other key features include A clear introduction to discourse analytic traditions Tips on how to produce effective field notes Guidance on how to manage interview and conversational data Advice

Sociolinguistic Perspectives on Migration Control Markus Rheindorf, Ruth Wodak, 2020-01-30 In the midst of an international crisis in migration policy widely referred to as a refugee crisis this book brings together timely analyses of the manifold and yet specific ways in which migration affects globalized societies set against the background of the rise of nationalist and populist movements The voices of migrants and refugees are rarely heard in this context usually they are debated about summarized and reported but their agency is denied Each contribution to this volume adds an empirical perspective to our understanding of how language relates to migration in a specific national context The chapters use innovative combinations of multimodal qualitative and quantitative analyses to examine a broad range of genres and data related to the voices of migrants and reporting about migrants

Multilingual Literacies, Identities and Ideologies Tony Capstick, 2016-10-25 This book explores the language and literacy practices which sustain transnational migration across generations and across traditional boundaries such as school and home The author has conducted extensive fieldwork in Pakistan and the UK to study migration between the two countries Individuals access to the dominant literacies of migration are contrasted with the vernacular practices which migrants take up at home as part of their digital literacies The study explores the blurring of boundaries between home and school as well as the blurring of boundaries between language varieties Tracing access to literacy in this way also shines a light on the literacy mediators migrants turn to for help with English language learning and when trying to access the bureaucratic literacies of migration The study ends by exploring how migrants use all of their language resources not just English to fit into their new homes once they have arrived in the UK

English in Business and Commerce Tamah Sherman, Jiri Nekvapil, 2018-05-07 This volume fills an important gap in exploring English in the domains of business and commerce through the prism of sociolinguistics and the sociology of language as opposed to analyzing business genres or taking a linguodidactic approach It expands the regional coverage of English in Europe with several studies based in Central Europe and also considers contexts which interact with Europe even though they are physically outside of it Asia Africa It addresses English as just one of several languages at play in the ecology of the countries It focuses not only on the position of languages as declared in documents of various organizations that is language policy but also everyday linguistic practices as observed in business contexts that is interactions The studies are divided into three thematic areas ideologies and discourses on English in the business sphere the management of English in business and organizational contexts and English and other languages on local and international labor markets It will be of interest to readers concerned with multilingualism in the economic sphere and the workplace and the interplay between macro and micro levels during the management of communication in organizations

studies from a multidisciplinary theoretical methodological and empirical perspective The chapters in this volume are written by international scholars active in the field of language policy and planning and discourse studies The diverse research contexts range from education in Paraguay and Luxembourg via businesses in Wales to regional English language policies in Tajikistan Readers are thereby invited to think critically about the mutual relationship between language policy and discourse in a range of social political economic and cultural spheres Using approaches that draw on discourse analytic anthropological ethnographic and critical sociolinguistic frameworks the contributors in this collection explore and refine the discursive and the critical aspects of language policy as a multilayered fluid ideological discursive and social process that can operate as a tool of social change as well as reinforcing established power structures and inequalities

Multilingualism in Ancient Contexts Louis C. Jonker, Angelika Berlejung, Izak Cornelius, 2021-05-03 Multilingualism remains a thorny issue in many contexts be it cultural political or educational Debates and discourses on this issue in contexts of diversity particularly in multicultural societies but also in immigration situations are often conducted with present day communicational and educational needs in mind or with political and identity agendas This is nothing new There are a vast number of witnesses from the ancient West Asian and Mediterranean world attesting to the same debates in long past societies Could an investigation into the linguistic landscapes of ancient societies shed any light on our present day debates and discourses This volume suggests that this is indeed the case In fourteen chapters written and visual sources of the ancient world are investigated and explored by scholars specialising in those fields of study to engage in an interdisciplinary discourse with modern day debates about multilingualism A final chapter by an expert in language in education responds critically to the contributions in the book to open avenues for further interdisciplinary engagement together with contemporary linguists and educationists on the matter of multilingualism
