The Passport in America Craig Robertson,2010-07-02 In today s world of constant identification checks it s difficult to recall that there was ever a time when proof of identity was not a part of everyday life And as anyone knows who has ever lost a passport or let one expire on the eve of international travel the passport has become an indispensable document But how and why did this form of identification take on such a crucial role In the first history of the passport in the United States Craig Robertson offers an illuminating account of how this document above all others came to be considered a reliable answer to the question who are you Historically the passport originated as an official letter of introduction addressed to foreign governments on behalf of American travelers but as Robertson shows it became entangled in contemporary negotiations over citizenship and other forms of identity documentation Prior to World War I passports were not required to cross American borders and while some people struggled to understand how a passport could accurately identify a person others took advantage of this new document to advance claims for citizenship From the strategic use of passport applications by freed slaves and a campaign to allow married women to get passports in their maiden names to the passport nuisance of the 1920s and the contested addition of photographs and other identification technologies on the passport Robertson sheds new light on issues of individual and national identity in modern U S history In this age of heightened security especially at international borders Robertson s *The Passport in America* provides anyone interested in questions of identification and surveillance with a richly detailed and often surprising history of this uniquely important document Economic

Army-Navy-Air Force Register and Defense Times ,1906 *Rail and the City* Roxanne Warren,2014-09-12 An architect makes the case for rail transit as the critical infrastructure for a fluidly functioning and environmentally sustainable urban society The United States has evolved into a nation of twenty densely populated megaregions Yet despite the environmental advantages of urban density urban sprawl and reliance on the private car still set the pattern for most new development Cars guzzle not only gas but also space as massive acreage is dedicated to roadways and parking Even more pressing the replication of this pattern throughout the fast developing world makes it doubtful that we will achieve the reductions in carbon emissions needed to avoid climate catastrophe In *Rail and the City* architect Roxanne Warren makes the case for compact urban development that is supported by rail transit Calling the automobile a relic of the twentieth century Warren envisions a release from the tyrannies of traffic congestion petroleum dependence and an oppressively paved environment Technical features of rail are key to its high capacities safety at high speeds and compactness uniquely qualifying it to serve as ideal infrastructure within and between cities Ultimately mobility could be achieved through extensive networks of public transit particularly rail supplemented by buses cycling walking car sharing and small flexible vehicles High speed rail fed by local transit could eliminate the need for petroleum intensive plane trips of less than 500 miles Warren considers issues of access to transit citing examples from Europe Japan and North America and pedestrian and transit oriented urban design Rail transit she argues is the essential infrastructure for a fluidly functioning urban society

Air University Library Index to Military Periodicals ,1997 The New York Times Index ,1966 **Host Bibliographic Record for Boundwith Item Barcode 30112027936324** ,1917 Greening the Red, White, and Blue Thomas Jundt,2014-03-12 In popular imagination environmentalism is often linked to Rachel Carson s *Silent Spring* and the political activism of the 1960s and 70s that moved increasing numbers of Americans to insist on a better quality of life open spaces clean air and water beautification campaigns But these interpretations have obscured the significant origins of environmentalism as a moral and intellectual broadside against the growing power of corporate capitalism both domestically and in the postwar liberal international order the United States was enacting abroad In *Greening the Red White and Blue* Thomas Jundt shows how many Americans came to view powerful corporations and a federal government bent on economic growth as threats to human health and the environment Fallout from atomic testing air and water pollution the proliferation of pesticides and herbicides all connected to the growing dominance of technology and corporate capitalism in American life led a variety of constituencies to seek solutions in what came to be known as environmentalism In addition to political and legal campaigns to effect change an alternative form of civic participation emerged beginning in the late 1940s as growing numbers of citizens turned to what they deemed environmentally friendly consumption practices The goal of this politically

charged consumption was not only to protect themselves and their families from harm but also to achieve social change at a time when many believed the government was placing the desires of business before the needs of its citizens. Politicians responded to the growing environmental concerns of middle class Americans but in the end continual political compromises with corporate power meant weak laws and lax enforcement. Many citizens sought refuge in an alternative green marketplace including organic foods, natural fiber clothing, alternative energy, and everyday products designed to have minimal environmental impact. In doing so they attempted to create a community for those who shared their concerns and frustrations as well as their vision for a different American Way. Thomas Jundt's work highlights the intertwining of consumerism and environmentalism amidst the growing power of corporate capitalism and government in postwar America. Solar Wind Charles P. Sonett, Paul Jerome Coleman, John Marsh Wilcox, 1972. Topics include magnetic structure of interplanetary and solar magnetic fields and solar wind.
