Public Health Aspects of HIV/AIDS in Low and Middle Income Countries David Celentano,Chris Beyrer,2008-09-11 It has now been 25 years since the apocryphal report in the CDC Morbidity and Mortality Weekly Report dated June 5 1981 entitled Pneumocystis Pneumonia Los Angeles which announced what was to become HIV AIDS HIV has now affected virtually all countries that have looked for it and has had a devastating impact on the public health and medical care infrastructure around the world HIV AIDS has also disproportionately affected nations with the least capacity to confront it especially the developing world nations in Sub Saharan Africa South and Southeast Asia and the emerging republics of Eastern and Central Asia The pandemic unlike any other disease of our time has had profound impacts on the practice of public health itself bringing affected communities into decision making demanding North South partnerships and collaborations and changing the basic conduct of clinical and prevention trials research While much has been written in scholarly publications for medical epidemiologic and disease control specialists there is no comprehensive review of the public health impact and response to HIV AIDS in the developing world This edited volume seeks to systematically describe the emergence and form of the epidemics epidemiology the social community and political response and the various measures to confront and control the epidemic with varying levels of success Of particular importance are strategies that appear to have been useful in ameliorating the epidemic while contrasting the situation in a neighboring country or region where contrasting prevention or care initiatives have had a deleterious outcome Common to all responses has been the international multi sectoral response represented by the Global Fund for HIV AIDS Malaria and Tuberculosis the President s Emergency Plan for AIDS Relief and the Gates Foundation among others to promote HIV pharmacologic therapy in resource poor settings The chapter authors will explore the political challenges in meeting HIV AIDS prevention and care in concert with the public health realities in specific country and regional context

[The Politics of National Languages in Postcolonial Senegal](#) Ibrahima Diallo,2010 Senegal claimed political independence from France in 1960 and Leopold Senghor became Senegal s first president Even though Senegal was no longer a French colony Senghor was determined to maintain the dominance of French culture and language in his country However pressure to give national languages more

power and space which had already started during French occupation continued intensely after independence Senghor's political adversaries as well as teacher and student unions workers and various activist groups roundly criticized Senghor's government for the language and education programs he chose for the Senegalese people The issue of national languages thus became a major political issue in Senegal with a far reaching and longstanding impact This book is a comprehensive study on the current language policies and practices in Senegal It illuminates the tension that has arisen from the enduring colonial legacies and their influences in postcolonial language policies in Senegal It also highlights the need for vigorous policy change to recognize the Senegalese languages especially in education and how the preservation of these languages is critical to identity and culture issues The book shows that it is important for the Senegalese people to retain their original local languages and how French and English are not simply the only languages needed for Senegal's success in the globalized economy In addition to a detailed history with supporting facts and figures this study also links socioeconomic cultural and political events in its analysis of the unstoppable rise of Wolof which is posing a significant threat to the already fragile local linguistic ecology This book will be of interest to scholars in applied and social linguistics African studies and policy studies
