Towns and Cities: Function in Form Julian Hart,2016-03-09 Challenging existing assumptions about how our towns and cities are structured and formed Julian Hart provides an engaging and thought provoking alternative theory of urban design This is not urban design in the sense of the practice of design rather it is a theory of the form of the town at all scales why towns and cities happen to be structured the way they are as a result of the social political legal and especially economic forces that create them The shape of the city at every scale from the internal configuration of dwellings all the way up to the superstructure of the whole city can be seen to arise from the interplay between three antagonistic socio economic tensions In going about our daily business and in championing particular political objectives we collectively fashion our cities in terms of their structure and form This leads to various new ways of understanding how and why our cities so happen to be configured the way they are The book makes a step change from any other comparable studies by understanding our towns and cities in terms of function in form This helps us to appreciate why every town is a recognisable town wherever it is Different urban environments in different parts of the world past and present can come to be seen according to their similarities instead of their differences Furthermore by appreciating how the economic influences of everyday life structure our towns and cities we can in turn begin to understand

better how the shape of towns and cities affects the quality of life of inhabitants and the cohesiveness of communities In covering all scales from inside the home to macrostructure of the city the book encapsulates urban design through to town planning and does not seek to distinguish between the various design disciplines *Entrepreneurship, Universities & Resources* Ulla Hytti,Robert Blackburn,Denise Fletcher,Friederike Welter,2016-11-25 The role of resources is pivotal in entrepreneurship for the success of new and small ventures though most face resource constraints The book offers multiple perspectives on analysing and understanding the importance of resources in entrepreneurship development Approaching the subject with both a practice theory and research based approach the contributors analyse topics such as processes and structures in social entreprenuring entrepreneurship and equity in crowdfunding and forming alliances with large firms to overcome resource constraints The contributors provide evidence for example on how business angels can contribute more than finance to small ventures and how the flexibility of resources is important in internationalisation *Despite The State: Why India Lets Its People Down And How They Cope* M. Rajshekhar, About the Book A LUCID NECESSARY ACCOUNT OF HOW DRASTICALLY THE INDIAN STATE FAILS ITS CITIZENS The story of democratic failure is usually read at the level of the nation while the primary bulwarks of democratic functioning the states get overlooked This is a tale of India s states of why they build schools but do not staff them with teachers favour a handful of companies so much that others slip into losses wage water wars with their neighbours while allowing rampant sand mining and groundwater extraction harness citizens right to vote but brutally crack down on their right to dissent Reporting from six states over thirty three months award winning investigative journalist M Rajshekhar delivers a necessary account of a deep crisis that has gone largely unexamined
