National Senior Certificate Mathematical Literacy Grade P2014:

Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice. Focussing its discussion within the context of mathematics education, it argues that while research generated insights can have beneficial effects on learning and teaching, the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice. In the first part of the book, four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom. In the second part, each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms. Combining two discourses, that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice, the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education, educational research and classroom practices. This book will be key reading for postgraduates, researchers and academics in education and particularly in the areas of mathematics education, education research, teacher education and classroom practice. It will also appeal to teacher educators, practitioners and undergraduate students interested in educational research.

Teaching Learners with Visual Impairment Maximus M. Sefotho, Ronél Ferreira, 2020-12-31 This book, *Teaching Learners with Visual Impairment*, focuses on holistic support to learners with visual impairment in and beyond the classroom and school context. Special attention is given to classroom practice, learning support, curriculum differentiation and assessment practices, to mention but a few areas of focus covered in the book. In this manner, this book makes a significant contribution to the existing body of knowledge on the implementation of inclusive education policy with learners affected by visual impairment.

International Handbook of Mathematical Learning Difficulties Annemarie Fritz, Vitor Geraldi Haase, Pekka Räsänen, 2019-01-30 This comprehensive volume provides teachers, researchers and education professionals with cutting edge knowledge developed in the last decades by the educational, behavioural and neurosciences, integrating cognitive, developmental and socioeconomic approaches to deal with the problems children face in learning mathematics. The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades, but the most part of this research has been conducted in non-applied settings and there is still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings. Now it is time to bring the results from the laboratory to the classroom. Apart from bringing the theoretical discussions to educational settings, the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective

interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society

Decolonising Schools in South Africa Pam Christie, 2020-06-07 This book explores the challenge of dismantling colonial schooling and how entangled power relations of the past have lingered in post apartheid South Africa It examines the on the ground history of colonialism from the vantage point of a small town in the Karoo region showing how patterns of possession and dispossession have played out in the municipality and schools Using the strong political and ontological critique of decoloniality theories the book demonstrates the ways in which government interventions over many years have allowed colonial relations and the construction of racialised differences to linger in new forms including unequal access to schooling Written in an accessible style the book considers how the dream of decolonial schooling might be realised from the vantage point of research on the margins This Karoo region also offers an interesting case study as the site where the world's largest radio telescope was recently located and highlights the contrasting logics of international big science and local development needs This book will be of interest to academics and scholars in the education field as well as to social geographers sociologists human geographers historians and policy makers Chapters 1 and 10 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Translanguaging in Science Education Anders Jakobsson, Pia Nygård Larsson, Annika Karlsson, 2022-02-23 This edited volume explores diverse translanguaging practices in multilingual science classrooms in Hong Kong Lebanon Luxembourg South Africa Sweden and the United States It presents novel opportunities for using students' home first or minority languages as meaning making tools in science education It also invites to explore the use of language resources and other multimodal resources such as gestures and body language In addition it discusses and problematizes contingent hindrances and obstacles that may arise from these practices within various contexts around the world This includes reviewing different theoretical starting points that may be challenged by such an approach These issues are explored from different perspectives and methodological focus as well as in several educational contexts including primary middle secondary levels higher education as well as in after school programs for refugee teenagers Within these contexts the book highlights and shares a range of educational tools and activities in science education such as teacher led classroom talk language focused teaching teachers use of meta language teachers scaffolding strategies small group interactions and computer supported collaborative learning
