Authentic Diversity Michelle Silverthorn, 2020-09-08

The nation has transformed. The calls for racial equity are loud and insistent and they are now being listened to. And yet companies across the country are still far behind when it comes to equity in the workplace. For decades we've heard variations on the same theme on how to increase diversity and inclusion and we have still not moved. If we want equity to matter inside and outside the workplace if we want to be real allies for change then we need a new approach. We need to stop following trends. We need to lead change. In *Authentic Diversity* culture change expert and diversity speaker Michelle Silverthorn explains how to transform diversity and inclusion from mere lip service into the very heart of leadership. Following the journey of a Black woman in the workplace, leaders learn the old rules of diversity that keep failing her and millions like her again and again and the new rules they must put in place to make success a reality for everyone. A millennial immigrant and Black woman in America, Michelle will show you how to lead a space centered on equity, allyship, and inclusion and how together we can build a new organization and nation centered on justice.

The Key to Nuclear Restraint Thomas Jonter, 2016-05-11

Why have some nations acquired nuclear weapons while others have refrained from doing so? Most research related to this question has focused on states that have built nuclear weapons, yet little attention has been devoted to countries that have chosen nuclear restraint. This book analyzes Swedish plans to acquire nuclear weapons during the Cold War. Sweden was very close to putting a bomb together in the 1960s but for a number of reasons illuminated in this book, decision makers abandoned those plans and subsequently rose to become one of the most recognized players in the international game of disarmament. Thanks to the recent declassification of essential documentation in Sweden and the United States, it is now possible to assemble a comprehensive analysis of the Swedish nuclear weapons program based on primary sources. This book presents that analysis, a unique perspective owing to the fact that nuclear

development is a highly secretive activity in most countries with non existent or limited access to state archives

Investigating the oceans Great Britain: Parliament: House of Commons: Science and Technology Committee, Great Britain. Parliament. House of Commons.
