

Cycles in Nature Study Guide

Matter moves between the environment and living things in all cycles of matter (water, carbon and nitrogen).

Water Cycle:

- **Evaporation** is a change of water from liquid to gas.
- **Condensation** is the change of water from gas to liquid.
- **Precipitation** is when water falls back to Earth in the form of rain, snow, sleet or hail.
- Most precipitation that falls to Earth's surface falls directly into oceans.
- Transpiration is when plants release water.
- Groundwater (water under the Earth's surface) is an important part of the water cycle.

- Carbon is important to living things because it transports the material cells use for energy.
- Carbon from the environment becomes a part of living organisms through the process of photosynthesis.
- **Photosynthesis** is when plants use carbon dioxide from the air to make glucose (sugar).
- Most animals get the carbon they need by eating plants.

Neo-Aristotelian Metaphysics and the Theology of Nature William M.R. Simpson,Robert C. Koons,James Orr,2021-10-10 This book explores the relationship between a scientifically updated Aristotelian philosophy of nature and a scientifically engaged theology of nature It features original contributions by some of the best scholars engaging with Aristotelianism in contemporary metaphysics philosophy of science and philosophical theology Despite the growing interest in Aristotelian approaches to contemporary philosophy of science few metaphysicians have engaged directly with the question of how a neo Aristotelian metaphysics of nature might change the landscape for theological discussion concerning theology and naturalism the place of human beings within nature or the problem of divine causality The chapters in this volume are collected into three thematic sections Naturalism and Nature Mind and Nature and God and Nature By pushing the current boundaries of neo Aristotelian metaphysics to recover the traditional notion of substantial forms in physics reframe the principle of proportionality in biology and restore the hierarchy of being familiar to ancient philosophy this book advances a metaphysically unified framework that accommodates both scientific and theological knowledge enriching the interaction between science philosophy and theology *Neo Aristotelian Metaphysics and the Theology of Nature* will be of
