Nature Scavenger Hunt Checklist:

The Ultimate Book of Scavenger Hunts Stacy Tornio, 2020-06-01 It's hard to resist a scavenger hunt. Give kids a list of things to find and they naturally want to turn it into a game and start checking things off. Add in an outdoor and nature twist and the game is elevated to a whole new level and what an amazing opportunity to engage kids and families with nature in a whole new way. The Ultimate Book of Scavenger Hunts will help turn every outdoor outing into a scavenger hunt with plenty of things for your family to look for, discover, and learn about. Geared towards families with kids ages 4-10, the hunts are geared to just about any location from city to farm to beach to mountains. The book includes a leveled difficulty rating system so you can find both easy and difficult items within each hunt, 1 being easy, 2 medium, 3 hard. Each hunt comes complete with factoids and information about the items on the list and each item is accompanied by a colorful spot illustration so that the hunter can easily identify what they are looking for.

Inspiring STEM Minds Aaron D. Isabelle, Nataly Z. Valle, 2015-12-28 The purpose of this book is to serve as a supplemental reference text for 21st century elementary classrooms. The primary objective is to help teachers inspire and engage their students in the STEM (science, technology, engineering, and mathematics) subjects. The push for incorporating STEM education in elementary school has become increasingly important, yet most educators and publishers have offered problem-based activities without considering one of the most important pedagogical entry points to lesson planning: the hook or the opening and attachment to initial background. This initial background clip, initial background position, and initial background repeat are key. Inspiring STEM Minds aims at providing teachers an effective, easy-to-use text that they can use to discuss specific mathematicians, engineers, inventors, and scientists, although the individuals chosen for each section of the book are in no way an exhaustive or selective group that may characterize each discipline. This reference text is organized into four key sections depicting the four disciplines that make up STEM education. Each section briefly gives historical background as well as provides a problem or short activity designed to use everyday materials so that teachers can implement the activity in their classrooms. The classroom activities are directly related to each biography and have, we believe, great potential to engage students in the classroom. Each activity is also correlated to the National Standards and we also supplement the activities with suggestions for interdisciplinary connections. We hope this book serves as a valuable resource for classroom teachers.
