

## Respiratory Assessment for Nurses (part two)

### Introduction

Part one of Respiratory Assessment for Nurses outlined the importance of appropriate respiratory assessment to improve care outcomes for the acutely ill ward patient. Moreover, it is recognised that deterioration in physiological status is often not appreciated, nor acted on in a timely manner (NICE 2007, Cioffi 2000b, Considine and Botti 2004, Franklin and Matthew 1994, Massey et al 2008). Evidence suggests that clinical staff may lack the required knowledge and skills to perform a comprehensive respiratory assessment which ultimately has a deleterious effect on the potential to minimise adverse patient events (Harrison et al 2006, Considine 2005, Kause et al 2004, Massey et al, 2008). In the first part of this article, respiratory inspection and palpation were described and discussed. In this second article the skills of percussion and auscultation will be explained in order to equip cardiac nurses with a comprehensive systematic model for respiratory assessment.

### Percussion

Percussion is a key component of respiratory assessment that should be used in conjunction with auscultation to aid differential diagnosis (Mangione 2008). Percussion produces audible sounds (percussed notes) and palpable vibrations which can help to determine if the underlying lung tissue is filled with fluid, air or solid material (Douglas et al 2009). Pathophysiological changes occurring in the lungs as a result of conditions such as pneumothorax, pleural effusion and consolidation alter the characteristics of percussion notes which, when considered in the context of a comprehensive respiratory examination can assist with differential diagnosis. Percussion should be performed in sequence in the interspaces at 5cm intervals (avoiding the damping effect of the scapulae and ribs) over both sides of the chest, whilst paying close attention to the audible changes in percussion notes (Jarvis 2007) (figure 1). Percussion technique requires practice and can be difficult to master but good technique is important to extract accurate findings.

delighted to endorse this practical and accessible guide to writing and developing a portfolio for nurses Unlike many how to do approaches to portfolio compilation this book acknowledges the complexity involved in learning from practice and recording that learning in a meaningful way The book respectfully guides the reader through essential elements to be considered if a portfolio is to be more than a depository of paper yet avoids prescription in acknowledging the individual nature of the portfolio and its necessity to reflect the nurse s own journey through their career Professor Melanie Jasper Head of College of Human and Health Sciences Swansea University UK The compilation of a nursing portfolio is a task which is often neglected in the busy student nurse s life between long shifts and assignments Timmins Duffy encourage one to take on the challenge and guide one through the process systematically Examples of structured reflections and of portfolio layouts make the realisation of one s own well presented portfolio easier than one might think Any student or qualified nurse will thus benefit from Timmins Duffy s encouraging book Karin Schirmaier Student University of the West of England UK This book is intended for nurses at all stages of their careers and offers a much needed step by step guide to planning writing and maintaining a portfolio I was particularly pleased to see a strong emphasis on reflection and education as a means of encouraging nurses to think critically and learn from their own practice All in all this is a very well constructed book which I highly recommend Professor Gary Rolfe Swansea University UK This handy guide co published with the Nursing Standard is perfect for nurses who need to put together a portfolio and don t know where to start Written as a step by step guide it answers all the common questions about how to compile and write a good nursing portfolio Each chapter includes different tasks so you can create your portfolio as you work through the book The book assumes no prior knowledge of portfolio building and includes Examples of good and challenging portfolio pieces Tools and techniques for reflection and critical thinking Guidance on the NMC competency frameworks Writing your Nursing Portfolio is indispensable reading for all nursing students looking for a clear and accessible guide to creating and developing a portfolio The book describes how the nursing portfolio fits into clinical practice and how it can make a positive difference to the nurse patient and others
