## I. INTRODUCTION (*HEADING 1*)

All manuscripts must be in English. These guidelines include complete descriptions of the fonts, spacing, and related information for producing your proceedings manuscripts. Please follow them and if you have any questions, direct them to the production editor in charge of your proceedings (see author-kit message for contact info).

This template provides authors with most of the formatting specifications needed for preparing electronic versions of their papers. All standard paper components have been specified for three reasons: (1) ease of use when formatting individual papers, (2) automatic compliance to electronic requirements that facilitate the concurrent or later production of electronic products, and (3) conformity of style throughout a conference proceedings. Margins, column widths, line spacing, and type styles are built-in; examples of the type styles are provided throughout this document and are identified in italic type, within parentheses, following the example. **PLEASE DO NOT RE-ADJUST THESE MARGINS.** Some components, such as multi-leveled equations, graphics, and tables are not prescribed, although the various table text styles are provided. The formatter will need to create these components, incorporating the applicable criteria that follow.

**Scientific Paper** , *Corpus Linguistics and Linguistic Theory* , 2021-10-25 From being the occupation of a marginal and frequently marginalised group of researchers the linguistic analysis of machine readable language corpora has moved to the mainstream of research on the English language In this process an impressive body of results has accumulated which over and above the intrinsic descriptive interest it holds for students of the English language forces a major and systematic rethinking of foundational issues in linguistic theory Corpus linguistics and linguistic theory was accordingly chosen as the motto for the twentieth annual gathering of ICAME the International Computer Archive of Modern Medieval English which was hosted by the University of Freiburg Germany in 1999 The present volume which presents selected papers from this conference thus builds on previous successful work in the computer aided description of English and at the same time represents an attempt at stock taking and methodological reflection in a linguistic subdiscipline that has clearly come of age

Contributions cover all levels of linguistic description from phonology prosody through grammar and semantics to discourse analytical issues such as genre or gender specific linguistic usage They are united by a desire to further the dialogue between the corpus linguistic community and researchers working in other traditions Thereby the atmosphere ranges from undisguised skepticism as expressed by Noam Chomsky in an interview which is part of the opening contribution by Bas Aarts to empirically substantiated optimism as for example in Bernadette Vine s significantly titled contribution Getting things done
