Handbook of Research on Teacher Practices for Diverse Writing Instruction Hodges, Tracey S., 2022-05-20 The art and practice of writing is complex and multidimensional. Students often apply unique writing styles. As such, educators must apply focused teaching methods to nurture these unique forms of writing. Educators must stay up to date with the practices for diverse writing instruction in order to best engage with a diverse classroom. However, resources related to writing typically do not focus on the depth and breadth of writing, and there is a need for a resource that offers a comprehensive look at diverse writing instruction research. The Handbook of Research on Teacher Practices for Diverse Writing Instruction provides a rich discussion of the issues, perspectives, and methods for writing instruction currently in use, with an added lens focusing on diversity and equity. It provides unique coverage on the topic of writing instruction for practical implementation within the classroom setting. Covering topics such as student motivation, curriculum development, and content area instruction, this major reference work is an essential resource for preservice teachers, faculty, and administration of K-12 and higher education, academic libraries, government officials, school boards, researchers, and academicians. **Teaching and Learning Secondary School Mathematics** Ann Kajander, Jennifer Holm, Egan J Chernoff, 2018-10-24 This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators. It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada. The chapters address topics of broad applicability such as technology in learning mathematics, recent interest in social justice contexts in the learning of mathematics, as well as Indigenous education. The voices of classroom practitioners, the group ultimately responsible for implementing this new vision of mathematics teaching and learning, are not forgotten. Each section includes a chapter written by a classroom teacher, making this volume unique in its approach. We have much to learn from one another.

and this volume takes the stance that the development of a united vision supported by both research and professional dialog provides the first step
