School Science Practical Work in Africa Umesh Ramnarain, 2020-06-01 *School Science Practical Work in Africa* presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry based learning which signals a definite paradigm shift from the traditional teacher dominated to a learner centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work and professional development in teaching practical work. This book will be of great interest to academics, researchers and post graduate students in the fields of science education and educational policy.

Multilingual classroom contexts Christa van der Walt, Verbra Pfeiffer, 2021-12-01 By far the majority of South African students get their schooling in a second language which means that our classrooms are multilingual. This state of affairs is not exclusive to our country as can be seen in the many academic conferences on multilingual learning and teaching. Terms like translanguaging and biliteracy appear in many articles and books that discuss the role language in education. What makes the multilingual nature of our South African classrooms challenging is the fact that many learners switch from one language of learning and teaching to another at various points in their school career from home language to English or Afrikaans after the foundation phase from one language of learning and teaching to another when they move to new schools, high school or tertiary institutions. This book is an attempt to highlight the transitions from home to school from foundation to intermediate phase from primary to high school and from high school to tertiary institutions.

Creating Effective Teaching and Learning Spaces: Shaping Futures and Envisioning Unity in Diversity and Transformation Zilungile Lungi Sosibo, Eunice Ivala, 2021-09-07 Higher education in post apartheid South Africa was always likely to attract academic interest and yet there remains a dearth of research on creating teaching and learning spaces suitable for students from diverse backgrounds. Using examples from higher education institutions across the Southern African Developing Community SADC region, this volume explores the ways teaching and learning spaces are being used to advance the transformation agenda of higher education in these regions and provides concrete recommendations for the future. The book is sure to appeal to academics from a variety of disciplines from African, African American and ethnic studies to education and sociology. It will be of particular interest to teacher trainers, administrators and policy makers working in higher education and anyone else with a stake in managing cultural diversity in education.
