School Science Practical Work in Africa Umesh Ramnarain, 2020-06-01 School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry based learning which signals a definite paradigm shift from the traditional teacher dominated to a learner centered approach. The book provides empirical research on approaches to practical work contextual factors in the enactment of practical work and professional development in teaching practical work. This book will be of great interest to academics, researchers and post graduate students in the fields of science education and educational policy.

Exemplars of Curriculum Theory Arthur K. Ellis, 2014-01-09 This book crosses the divide between theoreticians and practitioners by demonstrating how curriculum theories and models are applied in classrooms today. It ties together broad educational theories such as progressivism, essentialism, perennialism etc. curriculum models characterized as learner centered, society centered or knowledge centered and exemplars of curriculum theories and models such as Reggio Emilia, Core Knowledge, the International Baccalaureate etc.

Seeing Science Through the Eyes of Canadian Teachers and Learners Christine D. Tippett, *Comparison of Mathematics and Physics Education II* Frederik Dilling, Simon F. Kraus, 2022-07-01 Interdisciplinary teaching is considered as one of the main goals of education worldwide. At the same time it poses an immense challenge to teachers who have been trained in only one of the combined subjects. This is true even for closely related disciplines such as mathematics and physics. In this volume practice oriented educational comparisons are made across various topics that are highly relevant in both subjects. Furthermore practical examples are presented in the form of lesson plans in which exemplary implementation in class is presented considering both educational perspectives.

Current And Advanced Researches In Science And Math Education I Tayfun Tutak, 2024-05-03 *STEM Education: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources, 2014-12-31 This reference brings together an impressive array of research on the development of Science Technology Engineering and Mathematics curricula at all educational levels. Provided by publisher.

Towards a Theory of Spacetime Theories Dennis Lehmkuhl, Gregor Schiemann, Erhard Scholz, 2017-01-05 This contributed volume is the result of a July 2010 workshop at the University of Wuppertal Interdisciplinary Centre for Science and Technology Studies which brought together world wide experts from physics, philosophy and history in order to address a set of questions first posed in the 1950s. How do we compare spacetime theories? How do we judge objectively which is the best theory? Is there even a unique answer to this question? The goal of the workshop and of this book is to contribute to the development of a meta theory of spacetime theories.

Such a meta theory would reveal insights about specific spacetime theories by distilling their essential similarities and differences deliver a framework for a class of theories that could be helpful as a blueprint to build other meta theories and provide a higher level viewpoint for judging which theory most accurately describes nature But rather than drawing a map in broad strokes the focus is on particularly rich regions in the space of spacetime theories This work will be of interest to physicists as well as philosophers and historians of science working with or interested in General Relativity and or Space Time and Gravitation more generally
