**Diffusion Bonding of Materials** N.F. Kazakov, 2013-10-22 Diffusion Beading of Materials is an attempt to pool the experience in vacuum diffusion bonding accumulated by a number of mechanical engineering works research establishments and colleges The book discusses the principal bonding variables and recommended procedures for diffusion bonding in vacuum the equipment for diffusion bonding and production rate and the mechanization and automation of equipment The text also describes the diffusion bonding of steels the bonding of cast iron and cast iron to steel and the bonding of dissimilar metals and alloys The bonding of refractory and active metals and their alloys the bonding of high temperature alloys nickel and nickel alloys and the bonding of cemented carbides and of a cemented carbide to steel are also considered The book further tackles the repair and reconditioning by diffusion bonding the bonding of porous materials and diffusion metallurgy The text also encompasses nonmetals and their joining to metals quality control of diffusion bonded joints accident prevention and cleanliness in vacuum diffusion bonding     **Page's Engineering Weekly** ,1908     **Power** ,1923

**Process Technology for Semiconductor Lasers** Kenichi Iga, Susumu Kinoshita, 2013-03-07 Process Technology for Semiconductor Lasers describes the design principles of semiconductor lasers mainly from the fabrication point of view A review is given of the history of semiconductor laser development and applications and of the materials used in lasing at short to long wavelengths The basic design principles for semiconductor laser devices and the epitaxy for laser production are discussed An entire chapter is devoted to the technology of liquid phase epitaxy and another one to vapor phase and beam epitaxies The characterizations of laser materials and the fabrication and characteristics of semiconductor lasers are treated Mode control techniques are presented and surface emitting lasers are introduced in the final chapter

**Specifications and Drawings of Patents Issued from the United States Patent Office** United States. Patent Office, 1909     Engineering ,1869     *Power Plant Engineering* ,1920     The National Engineer ,1907     International Steam Engineer ,1926     The Mechanical Engineer William Henry Fowler, 1911     *The Foundations of Vacuum Coating Technology* Donald M. Mattox, D. M. Mattox, 2003-04-16 The Foundations of Vacuum Coating Technology is a concise review of the developments that have led to the wide variety of applications of this technology This book is a must have for materials scientists and engineers working with vacuum coating in the invention of new technologies or applications in all industries With over 370 references this is an excellent starting point for those who don't want to reinvent the wheel In particular the book is a valuable reference for those interested in researching proposed or existing patents This unique book provides a starting point for more in depth surveys of past and recent work in all aspects of vacuum coating The author uses his extensive knowledge of the subject to draw comparisons and place the information into the proper context This is particularly

important for the patent literature where the terminology does not always match industry jargon A section of acronyms for vacuum coating and glossary of terms at the end of the book are critical additions to the information every reader needs
