Exodus How Migration Is Changing Our World:

Exodus Paul Collier, 2013-09-01 It is one of the most pressing and controversial questions of our time vehemently debated steeped in ideology profoundly divisive Who should be allowed to immigrate and who not What are the arguments for and against limiting the numbers We are supposedly a nation of immigrants and yet our policies reflect deep anxieties and the quirks of short term self interest with effective legislation snagging on thousand mile long security fences and the question of how long and arduous the path to citizenship should be In Exodus Paul Collier the world renowned economist and bestselling author of The Bottom Billion clearly and concisely lays out the effects of encouraging or restricting migration Drawing on original research and case studies he explores this volatile issue from three perspectives that of the migrants themselves that of the people they leave behind and that of the host societies where they relocate Immigration is a simple economic equation but its effects are complex Exodus confirms how crucial it will be that public policy face and address all of its ramifications Sharply written and brilliantly clarifying Exodus offers a provocative analysis of an issue that affects us all

Exodus Paul Collier, 2013 Mass international migration is a response to extreme global inequality and immigration has a profound impact on the way we live Yet our views and those of our politicians remain caught between two extremes popular hostility to migrants tinged by xenophobia and racism and the view of business and liberal elites that open doors are both economically and ethically imperative Few issues are so urgently in need of dispassionate analysis and few are more incendiary Clear headed and insightful Exodus seeks to defuse this explosive subject Paul Collier an internationally renowned economist and leading expert on global poverty looks at how the effects of extreme inequality are changing our world He shows how people from the world's poorest societies struggle to migrate to the rich West examines the effects on those left behind and on the host societies and explores the impulses and thinking that inform Western immigration policy Bringing sharp analysis and practical wisdom to this divisive issue Collier argues that while we must guard against the evils of nationalism national identity does matter and migration controls are increasingly important tools of social policy What is wrong is not that migrant controls exist but that their design is so inept It is not a question of whether migration is bad or good but how much migration is best

Migration as a global challenge Sarah Diehl, 2022-11-25 Migration is an integral part of human nature States however are still struggling to develop effective strategies towards migration governance This is especially evident in the case of Mexico and Germany two countries that have experienced high migratory pressure from 2015 onwards This study examines migration governance in both countries from a cross country perspective to draw broader conclusions regarding mitigation strategies of state and non state actors in different settings Furthermore it presents recommendations for action at the level of individual countries and at the global level Die Entwicklung effektiver Governancestrukturen im Bereich Migration ist eine Herausforderung für Staaten Die Studie untersucht die Handlungsstrategien Deutschlands und Mexikos zwei Länder die seit 2015 hohem Migrationsdruck ausgesetzt sind Im

Practicing Oral History Among Refugees and Host Communities provides a comprehensive and practical guide to applied oral history with refugees, teaching the reader how to use applied contemporary oral history to help provide solutions to the mega problem that is the worldwide refugee crisis. The book surveys the history of the practice and explains its successful applications in fields from journalism, law and psychiatry to technology, the prevention of terrorism and the design of public services. It defines applied oral history with refugees as a field, teaching rigorous, accessible methodologies for doing it as well as outlining the importance of doing the same work with host communities. The book examines important legal and ethical parameters around this complex, sensitive field and highlights the cost-effective, sustainable benefits that are being drawn from this work at all levels. The book takes a cursory look at the drivers and the directions of Africa's developmental drive as a largely developing continent within the frameworks of the ever-dynamic global space, putting into perspective inherent challenges and opportunities of the 21st Century and thereafter. Being the continent with most youthful population, Africa appears to still lack in requisite innovative interventions to transmute such demographic dividend into economic opportunities for the benefits of the larger population. Instead, there has been an increasing trend in South-North

migrations among both skilled and unskilled Africans across all age groups Besides impacts of climate change on the continent have also implied unstructured migratory trend within and beyond the bounds of the continent Africa has continued to play a feeble role in various United Nations UN enabled Conference of Parties COP negotiations such as the COP 26 in Glasgow Scotland 2021 The management of recent Covid 19 epidemic across the world has presented a clear pointer to Africa that except development is internally driven no one is ready to exogenously drive sustainable good life for others Ostensible vaccine nationalism that has dotted the production and availability of various Covid 19 vaccine brands which has ultimately left Africa as the begging continent one more time calls for in depth interrogation in contextualizing what the place of Africa has been is and to be within the global interactive mode

Climate Change and the Nation

State Anatol Lieven, 2020-03-02 Climate Change and the Nation State is the first book to tie the issue of action against climate change to nationalism Anatol Lieven argues that commitment to the future of the nation is the only way in which populations can be motivated to accept the sacrifices necessary to combat climate change National security establishments should prioritize climate change rather than lesser threats from rival powers Lieven supports the idea of a Green New Deal for both gaining public support for climate change action and building the national resilience but argues that it should be recalibrated to appeal to national unity and solidarity

The Last 10 Per Cent Erica Harper, 2023-03-28 Criticism that the development sector has not delivered in terms of eliminating extreme poverty fast tracking growth and preventing conflict is neither new nor surprising In fact it may be the one thing that scholars donors and practitioners agree on While many of these concerns are valid this book makes a case that

the sector is closer to unlocking the gates to more effective and efficient development outcomes than is popularly believed. Specifically it argues that by overturning a few myths making better use of evidence and employing some different rules practitioners policy specialists and donors can foster the changes in the development architecture that are needed to reach the 10 percent of the world's population still living in extreme poverty. Engaging provocative and clear sighted the book provides insight into interventions around democratic governance refugee response counterterrorism gender mainstreaming environmental protection and private sector engagement. It is instructive reading for professionals across the development sector think tanks and NGOs.
