Experiencing Architecture Chapter Summary:

Experiencing Architecture in the Nineteenth Century Edward Gillin, H. Horatio Joyce, 2018-10-18 Bringing together fourteen original essays this collection opens up new perspectives on the architectural history of the nineteenth century by examining the buildings of the period through the lens of experience With a focus on the experience of the ordinary building user rather than simply on the intentions of the designer the book shows that new and important insights can be brought to our understanding of Victorian architecture The chapters present a range of ideas and new research some examining individual building case studies from grand hotels and clubhouses in New York to the parliament buildings of Westminster and others exploring conceptual questions about the nature of architectural experience whether sensory or otherwise Yet they share the premise that the idea of the experience of architecture took on a new and particular significance with the rise of industrial modernity and they examine what contemporary people both architects and non architects understood by this idea The insights in this volume extend beyond the study of Victorian architecture Together they suggest how experience might be used as a framework to produce a more convincingly historical account of the artefacts of architectural history

Drawing and Experiencing Architecture Marianna Charitonidou, 2022-11-07 How were the concepts of the observer and user in architecture and urban planning transformed throughout the 20th and 21st centuries Marianna Charitonidou explores how the mutations of the means of representation in architecture and urban planning relate to the significance of city s inhabitants She investigates Le Corbusier and Ludwig Mies van der Rohe s fascination with perspective Team Ten s interest in the humanisation of architecture and urbanism Constantinos Doxiadis and Adriano Olivetti s role in reshaping the relationship between politics and urban planning during the postwar years Giancarlo De Carlo s architecture of participation Aldo Rossi s design methods Denise Scott Brown s active socioplactics and Bernard Tschumi s conception praxis A Philosopher Looks at Architecture Paul Guyer, 2021-05-20 What should our buildings look like Or is their usability more important than their appearance Paul Guyer argues that the fundamental goals of architecture first identified by the Roman architect Marcus Pollio Vitruvius good construction functionality and aesthetic appeal have remained valid despite constant changes in human activities building materials and technologies as well as in artistic styles and cultures Guyer discusses philosophers and architects throughout history including Alberti Kant Ruskin Wright and Loos and surveys the ways in which their ideas are brought to life in buildings across the world He also considers the works and words of contemporary architects including Annabelle Selldorf Herzog and de Meuron and Steven Holl and shows that despite changing times and fashions good architecture continues to be something worth striving for This new series offers short and personal perspectives by expert thinkers on topics that we all encounter in our everyday lives *Performing Home* Stuart Andrews, 2019-12-09 *Performing Home* is the first sustained study of the ways in which artists create artworks in and in response to domestic dwellings In the context of growing interest in ideas and practices that cross between architecture arts

practice and performance it is valuable to understand what happens when artists make work in and about specific buildings This is particularly important with domestic dwellings which can be bound up with experiences issues practices and understandings of home The book focuses on a range of recent artistic projects to identify and investigate critical ways by which artists practise domestic dwellings In doing so it addresses the ways in which artists enquire into a dwelling are resident in a dwelling adapt the form of a dwelling practise a mobile dwelling and make a dwelling By considering these practices together Andrews demonstrates the breadth and significance of recent artistic engagement in and with domestic dwellings and highlights the contribution that artistic practice can make to the ways in which we understand the form and practice of a building Performing Home will be of particular relevance to scholars students and practitioners in architecture art and performance to those in geography material culture and cultural studies and to anyone seeking to make sense of the place in which they live Advanced Intelligent Environments Wolfgang Minker, Michael Weber, Hani Hagra, Victor

Callagan, Achilles Kameas, 2009-06-16 Over the last decade a number of research areas have contributed to the concept of advanced intelligent environments these include ubiquitous computing pervasive computing embedded intelligence intelligent user interfaces human factors intelligent buildings mobile communications domestic robots intelligent sensors artistic and architectural design and ambient intelligence Undeniably multimodal spoken language dialogue interaction is a key factor in ensuring natural interaction and therefore of particular interest for advanced intelligent environments The book covers all the key topics in the field of intelligent environments from a variety of leading researchers Experience-Based Communication Jens Ornbo, Claus Sneppen, Peter Franklin Würtz, 2008-07-17 Experience based Communication is a powerful tool Companies can use it to bring their values to life and to make their messages accessible and credible By communicating in a way that can be both sensed and felt companies can increase their influence on internal and external stakeholders and existing and potential customers This book teaches you how to architect the way your company is experienced at every real life touchpoint How to use physical meetings and locations to create an affinity with a given market segment And how to engage your audience mentally physically and socially in order to transform them into loyal customers and willing ambassadors If you want to get closer to your target groups you will find no greater source of inspiration than the methods presented in this book Experience based Communication fills a much neglected hole of knowledge in the Experience Economy simultaneously making the point that proper staging and drama can make experiences more not less authentic As the authors make clear the Experience Medium IS the communicated message This book is a very valuable addition to the pantheon of the Experience Economy B Joseph Pine II and James H Gilmore co authors The Experience Economy and Authenticity What Consumers Really Want I normally dislike business books and books on communication are often the worst This book however has real personality and is an experience in itself to read Would that Chief Executives of today s organisations with their wretched dismembered irritating time consuming soul destroying We value your call systems would

spare some of their time to read this book all our lives would be enriched as a result It is worth remembering that there are only 100 cents in a Euro so cost cutting is finite whereas creating value for customers is infinite and is limited only by our own creativity and imagination Buy this book Enjoy it Malcolm McDonald Emeritus Professor at the Cranfield University School of Management The book Experience Based Communication highlights some of the most important issues regarding the embodiment of cultural artefacts and manifestos The architectural utterance is itself experience based Setting the stage for human interaction it adds to both history and social behaviour Read the book It is an inspirational source to everyone engaged with experience based communication Mette Kynne Frandsen CEO and Architect MAA at

HENNINGLARSENARCHITECTS This book is a must read for marketers seeking to find alternative ways to engage their target audiences in a deeper dialogue in order to build customer loyalty In a world where the new influencers preside over the all important word of mouth brands need to be able to offer enduring and valuable experiences that are capable of transforming ordinary customers into willing ambassadors Charting a company s experience architecture offers the ability to gauge where they stand and score in their consumers hearts minds and most importantly lives Joseph Jaffe President and Chief Interruptor crayon and author of Join the Conversation [Learning-Through-Touring](#) Juliet Sprake,2012-03-26

Learning through Touring uncovers ways in which people interact with the built environment by exploring the spaces around between and within buildings The key idea embodied in the book is that learning through touring is haptic the learner is a physical cognitive and emotional participant in the process It also develops the concept that tours rather than being finished products are designed to evolve through user participation and over time Part One of the book presents a series of analytical investigations into theories and practices of learning and touring that have then been developed to produce a set of conceptual methods for tour design Projects that have tried and tested these methods are described in Part Two

Technologies that have been utilised as portable tools for learning through touring are illustrated both through historical and contemporary practices In all of this there is an underlying belief that what is formally presented to us by authorities is open to self discovery questioning and independent enquiry The book is particularly relevant for those seeking innovative ways to explore and engage with the built environment mobile learning educators learning departments in museums galleries and historic buildings organisations involved in bridging the gap between architecture and public understanding and anyone who enjoys finding out new things about their environment **The Sitecore Architect's Blueprint** Radhakrishnan Arikrishna
