Experimental Design For The Life Sciences:

Experimental Design for the Life Sciences Graeme Ruxton, Nick Colegrave, 2011 Providing students with clear and practical advice on how best to organise experiments and collect data so as to make the subsequent analysis easier and their conclusions more robust this text assumes no specialist knowledge

Experimental Design for the Life Sciences Graeme D. Ruxton, Nick Colegrave, 2006 Experimental Design for the Life Sciences teaches the reader how to effectively design experiments to ensure that today's students are equipped with the skills they need to be the researchers of tomorrow With a refreshingly approachable and articulate style the book explains the essential elements of experimental design in clear practical terms so that the reader can grasp and apply even the most challenging concepts including power analysis and pseudoreplication

Principles of Experimental Design for the Life Sciences Murray R. Selwyn, 1996-05-23 Let this down to earth book be your guide to the statistical integrity of your work Without relying on the detailed and complex mathematical explanations found in many other statistical texts Principles of Experimental Design for the Life Sciences teaches how to design conduct and interpret top notch life science studies Learn about the planning of biomedical studies the principles of statistical design sample size estimation common designs in biological experiments sequential clinical trials high dimensional designs and process optimization and the correspondence between objectives design and analysis Each of these important topics is presented in an understandable and non technical manner free of statistical jargon and formulas Written by a biostatistical consultant with 25 years of experience Principles of Experimental Design for the Life Sciences is filled with real life examples from the author's work that you can quickly and easily apply to your own These examples illustrate the main concepts of experimental design and cover a broad range of application areas in both clinical and nonclinical research With this one innovative helpful book you can improve your understanding of statistics enhance your confidence in your results and at long last shake off those statistical shackles

Designing Experiments for the Social Sciences Renita Coleman, 2018-08-27 Designing Experiments for the Social Sciences How to Plan Create and Execute Research Using Experiments is a practical applied text for courses in experimental design The text assumes that students have just a basic knowledge of the scientific method and no statistics background is required With its focus on how to effectively design experiments rather than how to analyze them the book concentrates on the stage where researchers are making decisions about procedural aspects of the experiment before interventions and treatments are given Renita Coleman walks readers step by step on how to plan and execute experiments from the beginning by discussing choosing and collecting a sample creating the stimuli and questionnaire doing a manipulation check or pre test analyzing the data and understanding and interpreting the results Guidelines for deciding which elements are best used in the creation of a particular kind of experiment are also given This title offers rich pedagogy ethical considerations and examples pertinent to all social science disciplines

Experimental Design For The Life Sciences 2e Graeme D. Ruxton, 2006 **A Practical Guide to**

Scientific Data Analysis David J. Livingstone, 2009-12-10 Inspired by the author's need for practical guidance in the processes of data analysis *A Practical Guide to Scientific Data Analysis* has been written as a statistical companion for the working scientist This handbook of data analysis with worked examples focuses on the application of mathematical and statistical techniques and the interpretation of their results Covering the most common statistical methods for examining and exploring relationships in data the text includes extensive examples from a variety of scientific disciplines The chapters are organised logically from planning an experiment through examining and displaying the data to constructing quantitative models Each chapter is intended to stand alone so that casual users can refer to the section that is most appropriate to their problem Written by a highly qualified and internationally respected author this text Presents statistics for the non statistician Explains a variety of methods to extract information from data Describes the application of statistical methods to the design of performance chemicals Emphasises the application of statistical techniques and the interpretation of their results Of practical use to chemists biochemists pharmacists biologists and researchers from many other scientific disciplines in both industry and academia

Practical Skills in Forensic Science Alan Langford, John R. Dean, Robert H. Reed, Jonathan D. B. Weyers, David Holmes, Allan M. Jones, 2018 If you are studying forensic science or a related course such as forensic chemistry or biology then this book will be an indispensable companion throughout your entire degree programme This one stop text will guide you through the wide range of practical analytical and data handling skills that you will need during your studies It will also give you a solid grounding in the wider transferable skills such as teamwork and study skills

Animal Personality: The Science Behind Individual Variation Jill R.D. MacKay, 2018-04-09 From scaredy cats to moody cows we often give animals personality when we talk about them but does this have any basis in scientific fact How can we tell if a cat is feeling fear and how does a grumpy cow behave What would make an animal an individual And what makes them unique Only recently has science confirmed that animals have distinct individual personalities shown through behavioural research *Animal Personality* introduces the fundamentals of personality science and research describing the history of behavioural testing and then drills into scientific measurement recording and statistical analysis of individual personalities in animals The author shows how the implications of animals having personalities affects how we treat and care for pets farm animals and wildlife Interesting questions are posed such as what is the evolutionary reason for traits like fearfulness aggression and sociability Have we anthropomorphised animals needs for social interactions What are the neurological and genetic bases of personality How has personality affected the domestication of wild species And it questions long held beliefs about animal traits such as dominance theory *Animal Personality* provides a fascinating and informed insight into the science of personality and its application to non human animals Ethologists and animal owners will find this an illuminating and thought provoking resource
