The Psychology of Expertise Robert R. Hoffman, 2014-02-25. This volume investigates our ability to capture and then apply expertise. In recent years, expertise has come to be regarded as an increasingly valuable and surprisingly elusive resource. Experts who were the sole active dispensers of certain kinds of knowledge in the days before AI have themselves become the objects of empirical inquiry in which their knowledge is elicited and studied by knowledge engineers, experimental psychologists, applied psychologists, or other experts involved in the development of expert systems. This book achieves a marriage between experimentalists, applied scientists, and theoreticians who deal with expertise. It envisions the benefits to society of an advanced technology for capturing and disseminating the knowledge and skills of the best corporate managers, the most seasoned pilots, and the most renowned medical diagnosticians. This book should be of interest to psychologists as well as to knowledge engineers who are out in the trenches developing expert systems and anyone pondering the nature of expertise and the question of how it can be elicited and studied scientifically. The book's scope and the pivotal concepts that it elucidates and appraises, as well as the extensive categorized bibliographies it includes, make this volume a landmark in the field of expert systems and AI, as well as the field of applied experimental psychology.

Lloyd's Register Technical Association Session 1987-1988 Lloyd's Register Foundation, 1987-01-01. The Lloyd's Register Technical Association (LRTA) was established in 1920 with the primary objective of sharing technical expertise and knowledge within Lloyd's Register. Publications have consistently been released on a yearly basis, with a brief interruption between 1938 and 1946. These publications serve as a key reference point for best practices and were initially reserved for internal use to maximise LR's competitive advantage. Today, the LRTA takes a fresh approach, focusing on collaboration by combining professional expertise from across the LRF Group to ensure a frequent output of fresh perspectives and relevant content. The LRTA has evolved into a Group-wide initiative that identifies, captures, and shares knowledge spanning various business streams and functions. To support this modern approach, the LRTA has adopted a new structure featuring representatives and senior governance across

the business streams and the LR Foundation The Lloyd s Register Technical Association Papers should be seen as historical documents representing earlier viewpoints and are not reflective of current thinking and perspectives by the current LR Technical Association The Lloyd s Register Staff Association LRSA changed its name to the Lloyd s Register Technical Association LRTA in 1973

Report of the Round-Table Discussion: Moving Forward through Lessons Learned on Response Actions to Aquatic Animal Disease Emergencies, Rome, 16-18 December 2019 Food and Agriculture Organization of the United Nations ,2021-01-14 This report presents the results of a Round table discussion moving forward through lessons learned on

response actions to aquatic animal disease emergencies organized by the Food and Agriculture Organization of the United Nations FAO in collaboration with the Norwegian Agency for Development Cooperation NORAD under the auspices of the project GCP GLO 979 NOR Improving Biosecurity Governance and Legal Framework for Efficient and Sustainable Aquaculture Production that was held from 16-18 December 2019 at the FAO Headquarters in Rome Italy. The meeting was attended by 43 experts from 22 countries representing governance authorities, intergovernmental organizations, academia, research institutions and the private sector. Twenty presentations were delivered, namely: 1. National Competent Authority role and experiences; 2. Inter-governmental organization role and activities, experiences related to investigating specific mass mortalities of aquatic animals; 3. Producer and research academic sectors role and activities, experiences related to investigating specific mass mortalities of aquatic animals; and 4. Global Burden of Animal Diseases (GBAD). The meeting successfully achieved its objective of taking stock and sharing experiences and lessons learned, which were used for generating recommendations for the further development and improvement of the draft FAO Decision tree for dealing with aquatic animal mortality events and supporting guidance. The meeting generated an annotated table of contents for this decision tree document with the following major sections: namely, Introduction, Phases in an Emergency, Elements of an Emergency Response, Preparedness Phase, Response Phase, Recovery Phase, Decision tree for Mass Mortality Events, Conducting Field Investigation, Tools and Guidance, and Case Study Examples. It is expected that this document will be made available in 2021.

Cultural Expertise, Law, and Rights Livia Holden, 2023-05-19. Cultural Expertise: Law and Rights introduces readers to the theory and practice of cultural expertise in the resolution of conflicts and the claim of rights in diverse societies. Combining theory and case studies of the use of cultural expertise in real situations and in a great variety of fields, this is the first book to offer a comprehensive examination of the field of cultural expertise, its intellectual orientations, practical applications and ethical implications. This book engages an extensive and interdisciplinary variety of topics ranging from race, language, sexuality, Indigenous rights and women's rights to immigration and asylum laws, international commercial arbitration and criminal law. It also offers a truly global perspective covering cultural expertise in Africa, Asia, Australia, Europe, Latin America, the Middle East and North America. Finally, the book offers theoretical and practical guidance for the ethical use of cultural expert knowledge. This is an essential volume for teachers and students in the social sciences, especially law, anthropology and sociology, and members of the legal professions who engage in cross-cultural dispute resolution, asylum and migration, private international law and other fields of law in which cultural arguments play a role. The Open Access version of this book is available at www.taylorfrancis.com and has been made available under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 license.

New Challenges in Applied Intelligence Technologies Radosław Katarzyniak, 2008-06-17. To build intelligent systems that can cope with real-world problems, we need to develop computational mechanisms able to deal with very large amounts of data, generate complex plans, schedules and resource

allocation strategies re plan their actions in real time provide user friendly communication for human device interactions and perform complex optimization problems In each of these tasks intelligence technologies play an important role providing designers and creators with effective and adequate computational models The field of intelligence technologies covers a variety of computational approaches that are often suggested and inspired by biological systems exhibiting functional richness and flexibility of their natural behavior This class of technologies consists of such important approaches as data mining algorithms neural networks genetic algorithms fuzzy and multi valued logics rough sets agent oriented computation often integrated into complex hybrid solutions Intelligence technologies are used to build machines that can act and think like living systems solve problems in an autonomous way develop rich private knowledge bases and produce results not foreseen and programmed in a direct way by designers and creators
