## **Explaining Political Judgement:**

*Explaining Political Judgement* Perri 6, 2011-09-22 What is political judgement Why do politicians exhibit such contrasting thought styles in making decisions even when they agree ideologically What happens when governments with contrasting thought styles have to deal with each other In this book Perri 6 presents a fresh rigorous explanatory theory of judgement its varieties and its consequences drawing upon Durkheim and Douglas He argues that policy makers will understand and misunderstand their problems and choices in ways that reproduce their own social organisation This theory is developed by using the Cuban Missile Crisis of 1962 as an extended case study examining the decision making of the Kennedy Castro and Khrushchev regimes *Explaining Political Judgement* is the first comprehensive study to show what a neo Durkheimian institutional approach can offer to political science and to the social sciences generally

*Explaining Political Judgement* Perri 6, 2011 A fresh theory of political judgment using analysis of the Cuban Missile Crisis to provide new implications for political science

*Explaining Political Disagreement* Andrew Mason, 1993-08-27 This book considers a variety of explanations of why political disagreement is so extensive and persistent The author examines variants of the contestability and imperfection conceptions which have dominated political theory the idea that political disagreement is so pervasive because of its value ladenness that key political concepts are essentially contested that those who occupy very different political positions fail to understand each other He argues that we need to develop a framework which borrows elements from both schools of thought presupposing some form of moral cognitivism while recognizing that many political disputes cannot be resolved to the satisfaction of every reasonable person Within such a framework he shows how empirical models can be constructed which give an active role not only to the agent's reasons for his or her beliefs but also to other psychological and sociological considerations

**Political Judgement** Richard Bourke, Raymond Geuss, 2009-08-20 Leading scholars re examine political judgement attempting to understand the relationship between political theory and political practice

**Challenges to Political Decision-making** Hubert Heinelt, 2019-05-22 This book analyses the ability of individuals to create meaning through communicative interaction and of what seems to constrain and enable actors in taking collectively binding political decisions The book examines why in some contexts individuals consider something as evident and relevant for their action while others perceive them as nonsense or simply as fake news As such the book follows a research perspective based on a concept emphasizing that the core function of knowledge is related to the selection and integration of data and other information which give them substance Taking an interpretive political science perspective to knowledge the book overcomes particular deficiencies of policy learning concepts where the development of an understanding of reality is thematized in a way that supposedly decrypts everyday processes through which individuals understand reality and re orient their actions to intersubjective processes To better understand these intersubjective processes communicative mechanisms are worked through where knowledge claims are selected and integrated This book

will be of key interest to scholars and students of political science and policy analysis and more broadly to sociology and social theory geography planning philosophy communication studies and governance studies     Institutional Theory in Political Science B. Guy Peters, 2005-10-20 At the turn of the millennium there has been a major growth of interest in institutional theory and institutional analysis in political science This book identifies these approaches to institutions and provides a frame of reference for the different theories In the past decade there has been a major growth of interest in institutional theory and institutional analysis in political science There are however a variety of different approaches to the new institutionalism and these approaches rarely address the same issues This book identifies the various approaches to institutions and then provides a common frame of reference for the different theories Peters argues that there are at least seven versions of institutionalism beginning with the March and Olsen normative institutionalism and including rational choice historical and empirical approaches to institutions and their impact on public policy For each of the versions of institutionalism there is a set of identical questions including the definition of institutions the way in which they are formed how they change how individuals and institutions interact and the nature of a good institution Peters discusses whether there are really so many different approaches to institutionalism or if there is sufficient agreement among them to argue that there is really one institutional theory     *Sustainable Development Teaching* Katrien Van Poeck, Leif Östman, Johan Öhman, 2019-05-08 The aim of this book is to support and inspire teachers to contribute to much needed processes of sustainable development and to develop teaching practices and professional identities that allow them to cope with the specificity of sustainability issues and in particular with the teaching challenges related to the ethical and political dimension of environmental and sustainability education Bringing together recent scholarship on the topic this book translates state of the art academic research into teaching models methods and tools Starting with an outline of the challenge of sustainability it offers insights and models for understanding the interesting yet ambiguous concept of sustainable development and the complex process of transforming society in a more sustainable direction Part I It then goes on to provide a guide to preparing courses and lessons as well as tools for reflection about teaching practices and the multiplicity of approaches to addressing ethical and political challenges in sustainable development teaching Part II Finally the book offers useful conceptual frameworks models and typologies about the concrete design and implementation of sustainable development teaching Part III This book will be essential reading for students of education as well as teachers in compulsory and higher education and sustainability education researchers     **The Oxford Handbook of Behavioral Political Science** Alex Mintz, Lesley G. *Culture and the Idea of 'Public Opinion', 1867-1914* James Thompson, 2013-08-29 An examination of how public opinion functioned as a concept in late nineteenth and early twentieth century Britain      Teaching Political Science to Undergraduates Laure Paquette, 2016-01-15 By 2020 half of the world's population and most university students will have a supercomputer in their pockets This revolution will affect the way students respond to higher education The university classroom must henceforth engage students and the classic lecture format alone might not be enough to do so This book answers the question how university students can learn in the classroom what they cannot learn in any other way The answer is inspired by options that are not available to political scientists in the way that they are in the laboratories for the sciences in the performances for the live arts and in the studios for visual arts as well as ideas that are already present but not widespread in the discipline problem solving and case studies as in the professional schools and simulation exercises in many other disciplines This book proposes therefore an active pedagogy for political science at a time when active pedagogy is more important than ever Prof Laure Paquette PhD has been a visiting researcher or professor in 23 countries She has advised several foreign governments as well as her own Canada and has published extensively in four languages This is her sixteenth book      Mass Media and Political Decision-Making Nino Landerer, 2016-10-20 To what extent have political decision making processes become mediatized Based on this question the author analyzes media coverage and parliamentary actors MPs strategies and perceptions in three conflicted decision making processes in Switzerland Mediatization of politics refers to behavioral changes and adaptations of political actors institutions and processes that are related to mass media According to some scholars mediatization may lead to politics of immediacy conflict drama and personalization thereby challenging established institutions and processes in liberal democracies The quantitative and qualitative analyses of MPs strategies and perceptions provide new insights into how political actors may self mediatize in the advent of globalization and polarization Overall the book adopts an actor centric approach and shows that mediatization of politics is not a fate but a strategic choice      Institutional Legacies, Decision Frames and Political Violence in Rwanda and Burundi Stacey Mitchell, 2018-10-09 Rwanda and Burundi are strikingly similar countries that underwent democratization in the early 1990s In both resistance to democratic reforms led to coups d'état and presidential assassinations A conundrum arises in terms of what transpires next In Rwanda total genocide was perpetrated by extremist Hutu actors including government officials upon the country's Tutsi and politically moderate Hutu populations In Burundi the coup d'état failed and instead ushered in a lengthy period of civil war This divergence in outcome is puzzling given the similarity of these two countries and it is not adequately explained by studies that address collective violence in each This book utilizes an integrative approach that facilitates the formation of an explanation that more fully accounts for variation in the type of collective violence that occurred in Rwanda and Burundi Showing that political actors during periods of major institutional change do not all respond to or perceive reform in the exact same manner or in a necessarily rational manner this book makes an important

contribution to the literature on ethnic conflict collective violence and democratization in Africa      *Criminal Liability of Political Decision-Makers* Frank Zimmermann, 2017-08-28 This book is dedicated to a fundamental conflict in modern states those persons holding public office are no more than ordinary citizens Therefore their activities must as a matter of principle be subject to full judicial control But at the same time democratically legitimated politicians need some discretion in their decision making Allegations of politicians committing criminal offences in office quickly attract a great deal of media attention Even politicians themselves frequently use such allegations to discredit their political opponents However to date this topic has not been fully addressed on an academic level This book is a first step in this direction The individual contributions cover topics such as bad political decisions that result in a waste of taxpayers money corruption and conflicts of interest in political decision making immunities and procedural obstacles to the effective prosecution of politicians abuse of criminal law and criminal proceedings in the political arena criminal liability for decisions taken in situations of state emergency the role of criminal law in public opinion Leading experts examine these and other issues from a comparative perspective      *Convincing Political Stakeholders* Klemens Joos, 2023-10-23 In the new edition of his standard work the founder of one of the most successful lobbying companies in the European Union EU Prof Klemens Joos bundles experience acquired over more than three decades to form a scientific theory on governmental relations It focusses on the insight that in view of the increasingly complex decision making structures of the EU the most precise possible knowledge of decision makers and decision making processes is at least equally as important to success as the content aspects of interest representation In a new chapter the author sets out the formula for science based interest representation developed by him from his practical experience With the Treaty of Lisbon which entered into force on 1 December 2009 the EU de facto became a state territory stretching from Portugal to Finland and from Ireland to Cyprus The European Parliament became an equal status decision maker alongside the Council of the European Union Council The previous co decision procedure was elevated to become the standard procedure ordinary legislative procedure The so called qualified majority 55 percent of the EU member states which simultaneously represent at least 65 percent of the EU population was introduced for all important areas in the Council As a result the outcome of decision making processes has become largely incalculable for the actors on the European Union stage the EU member states EU regions companies associations and organisations The second edition includes a new chapter in which Prof Klemens Joos makes the variables of successful interest representation even more tangible on the basis of his scientific formula at the latest since the Treaty of Lisbon the basic prerequisite for successful interest representation in the EU involves the continuous and close intermeshing of the affected party s content competence of the four classic instruments of interest representation corporate representative offices associations public affairs agencies law firms with process structure competence i e the EU wide maintenance of the required spatial personnel and organisational capacities as well as strong networks across institutions political groups and member states on the part of an

independent intermediary The likelihood of success can be increased exponentially if success is achieved firstly in committing to the concern of an affected party through a change of perspective such that the positive effects on the common good are shifted into the foreground for the decision makers in the EU perspective change competence and secondly in successfully integrating the concern into the crucial decision making processes at the political level and continuously supporting it process support competence Guest authors This work includes guest contributions from Prof Christian Bl melhuber Berlin University of the Arts Prof Anton Meyer formerly LMU Munich Prof Armin Nassehi LMU Munich and Prof Franz Waldenberger Director of the German Institute of Japanese Studies Tokyo as well as a foreword by Prof Gunther Friedl Dean of the TUM School of Management and a preface by Prof Thomas F Hofmann President of TU Munich

**The Concept of Political Judgment** Peter J. Steinberger, 1993-09-15 Steinberger's conclusion that a coherent political society must also be a judgmental one flies in the face of much contemporary thinking *Handbook on Policy, Process and Governing* H.K. Colebatch, 2018-12-28 This Handbook covers the accounts by practitioners and observers of the ways in which policy is formed around problems how these problems are recognized and understood and how diverse participants come to be involved in addressing them H K Colebatch and Robert Hoppe draw together a range of original contributions from experts in the field to illuminate the ways in which policies are formed and how they shape the process of governing

**Political Choice** Roland M Czada, Adrienne Windhoff-Heritier, 2019-07-11 This book subtitled political actors in institutional settings addresses the main lines of reasoning of the new political institutionalism and rational choice theory It discusses the question Which particular rules logics or strategies of action can be found in the realm of politics

**The Motivated Construction of Political Judgements , Emerging China** Sudhir T. Devare, Swaran Singh, Reena Marwah, 2014-03-21 This volume seeks to examine the evolving contours of Asian multilateralism through emerging China and how it is likely to impact on the growth trajectories of Asian countries From this perspective it explores the prospects for partnership in Asia especially in terms of China's engagement with its principal Asian neighbours especially India A substantial part of the volume is devoted to debating China India relations highlighting their mutual stakes through their economic and security cooperation as well as their engagement with other countries and regional forums The book furthers the understanding of the rise of China from an Indian perspective while simultaneously locating China's rise in the economic dynamics of an emerging Asia The volume offers illuminating viewpoints analyses and insights from multiple perspectives mixed with academic rigour and up to date information It will be of interest to those engaged in economics politics trade relations Indo China relations foreign policy area studies public policy and strategic studies

*Evolution and Morality* James E. Fleming, Sanford V. Levinson, 2012-09-10 Can theories of evolution explain the development of our capacity for moral judgment and the content of morality itself If bad behavior punished by the criminal law is attributable to physical causes rather than being intentional or voluntary as traditionally assumed what are the implications for rethinking the criminal justice system Is evolutionary theory and nature

talk at least as practiced to date inherently conservative and resistant to progressive and feminist proposals for social changes to counter subordination and secure equality In *Evolution and Morality* a group of contributors from philosophy law political science history and genetics address many of the philosophical legal and political issues raised by such questions This insightful interdisciplinary volume examines the possibilities of a naturalistic ethics the implications of behavioral morality for reform of the criminal law the prospects for a biopolitical science and the relationship between nature culture and social engineering
