Echoes of Africa's Past. anthropologists and heritage scholars offering fresh perspectives on Africa's dynamic past and its relevance to debates on sustainability and cultural heritage in the Anthropocene. Archaeological knowledge is incremental and hard won. It is assembled through time-intensive study of fragmentary evidence and its corpus represents intergenerational effort. Though sometimes based on the study of stones, our interpretations are not written in them. Our working hypotheses typically run ahead of the evidence needed to assess them. Expanded investigations, new methods, and changing premises compel revision and sometimes outright rejection of earlier ideas. Typological aids deemed useful by earlier generations may outlive their usefulness at the same time as the evidence they organize remains pertinent and available for rethinking. The cumulative character of archaeological knowledge enables scalar perspectives across space and through time, casting what we know of one location in relief through comparison to others. These revisions, rethinkings, and scalar reflections encourage us to appreciate the complexity and diversity of past contexts as amply illustrated in contributions to this volume. In short, resuscitating echoes of Anthropocene Africa is painstaking work. In this way, and others, archaeology is and should be slow science. Ann B. Stahl, University of Victoria, BC, Canada. *The Epoch of Rhyme*, Pasquale De Marco, 2025-08-12.
