## Face To Face Examples For Home Health:

**Geriatric Home-Based Medical Care** Jennifer L. Hayashi, Bruce Leff, 2015-12-09 This book is a practical reference for any clinician who has struggled to care for an older adult in a home setting. The volume is written by experts in the field who describe fundamental principles and clinical approaches of geriatric home based care and their application to specific diseases and conditions including delirium, incontinence, falls, and chronic pain and disability. The book also details house calls for special populations from the developmentally disabled to those afflicted with neurologic or psychiatric diseases. The volume explores house calls within the context of the US healthcare system. *Geriatric Home Based Medical Care: Principles and Practice* is a valuable resource for geriatricians, geriatric nurses, primary care physicians, social workers, public health officials, and all medical professions who need tools to provide timely, compassionate, and high quality care for their older adult patients. *Home Healthcare Services and Technology Implications* Çapar, Haşim, Çakmak, Mehmet Aziz, 2025-08-12

As global populations age and healthcare demands shift, home healthcare is emerging as a vital model for delivering personalized, cost-effective care. Technological innovations are transforming how these services are designed, managed, and delivered. This transformation enhances the efficiency, accessibility, and responsiveness of care, especially in dispersed or high-need regions. At the same time, integrating advanced technologies raises critical considerations around equity, workforce development, and sustainable implementation. Addressing these dynamics is essential to shaping a resilient, inclusive, and future-ready healthcare system that meets evolving societal needs. *Home Healthcare Services and Technology Implications* explores the relationship between the development of home healthcare services and technological innovation in the field, addressing technological change and transformation of the new world, changes in population structure, and related health needs. Additionally, it focuses on how artificial intelligence and new algorithms will shape the growing expectations of healthcare services. Covering topics such as artificial intelligence, people with disabilities, and user interfaces, this book is an excellent resource for academicians, researchers, marketing professionals, human resources, and training professionals, health ministers, hospital managers, educators, and more. **Geriatric Home-Based Medical Care** Jessica L. Colburn, Bruce Leff, Mariah L. Robertson, Mattan Schuchman, 2024-11-25

Older adults are living longer with more chronic disease and functional impairment than at any other time in history. Office-based practice is inadequate to meet the needs of patients who have difficulty leaving their homes for routine or urgent visits, and health care clinicians must choose between trying to manage their problems via telehealth or sending them to the emergency room via ambulance. Indeed, many clinicians receive little or no training in home-based medical care and are unable to consider a home visit that might avert a health crisis or an emergency room visit. Other clinicians know that house calls are possible but may not know how to work them into day-to-day practice. In recent years, a growing number of clinicians have focused their practice on home-based medical care to meet the rising need. In fact, there has been a substantial increase in house calls provided to Medicare beneficiaries. In 2023, over 750

000 traditional Medicare beneficiaries and in 2022 over 680 000 Medicare Advantage beneficiaries received longitudinal home based medical care While the number of house calls has increased rapidly the number of clinicians providing those visits has markedly decreased suggesting that clinicians who are providing such care are making it the sole focus of their practice This book is intended to be a practical reference for any clinician who has struggled to care for an older adult who has difficulty getting to the office By describing fundamental principles of geriatric house call medicine and application to specific diseases and conditions we hope to provide clinicians with the tools they need to provide timely compassionate and high quality care for their older adult patients The second edition has been updated to reflect changes in the healthcare system and approaches to care since the publication of the first edition

Ethical Issues in Home Health Care Sheri Smith,Rosalind Ekman Ladd,Lynn Pasquerella,2008 This book will help to answer some of the growing number of ethical questions and more complex issues that home health care nurses face The cases presented in each chapter of the book are fictionalized situations based on interviews conducted with home health care nurses in both hospital sponsored and private agencies in hospices and in urban and rural settings Each chapter of the book is devoted to one of the main areas of concern for home health care nurses Focusing on specific cases it offers analysis and discussion of the ethical issues cites legal requirements where relevant and s
