This book seeks answers to a fundamental question perhaps one of the most important questions in America today How can we help children born into poverty transcend their disadvantages and enter the middle class as adults And in particular what role can our schools play There's little doubt that education and opportunity are tightly joined in the twenty-first century economy Almost every week brings a new study demonstrating that highly skilled workers are being rewarded with stronger pay and excellent working conditions while Americans with few skills are struggling mightily Expanding educational achievement then appears to be a clear route to expanding economic opportunity Yet much of our public discourse ends there Of course more young Americans need better education in order to succeed But what kind of education Is the goal college for all What do we mean by college Do our young people mostly need a strong foundation in academics What about so-called non-cognitive skills Should technical education make a comeback Education for Upward Mobility provides fresh perspectives and concrete ideas for policymakers at every level of government for leaders and policy analysts in education

Financing of Higher Education Donald Heller,Claire Callender,2013-06-07 The financing of higher education is undergoing great change in many countries around the world In recent years many countries are moving from a system where the costs of funding higher education are shouldered primarily by taxpayers through government subsidies to one where students pay a larger share of the costs There are a number of factors driving these trends including A push for massification of higher education in the recognition that additional revenue streams are required above and beyond those funds available from governments in order to achieve higher participation rates Macroeconomic factors which lead to constraints on overall government revenues Political factors which manifest in demands for funding of over services thus restricting the funding available for higher tertiary education A concern that the returns to higher education accrue primarily to the individual rather than to society and thus students should bear more of the burden of paying for it This volume will help to contribute to an understanding of how these trends occur in various countries and regions around the world and the impact they have on higher education institutions students and society as a whole With contributions for the UK USA South Africa and China this vital new book gives a truly global picture of the rapidly changing situation
