Geography Grade10 2013 Memo:

Deterritorializing/Reterritorializing Nancy Ares, Edward Buendía, Robert Helfenbein, 2017-05-10 This volume features scholars who use a critical geography framework to analyze how constructions of social space shape education reform. In particular, they situate their work in present-day neoliberal policies that are pushing responsibility for economic and social welfare, as well as education policy and practice, out of federal and into more local entities. States, cities, and school boards are being given more responsibility and power in determining curriculum content and standards, accompanied by increasing privatization of public education through the rise of charter schools and for-profit organizations' incursion into managing schools. Given these pressures, critical geography's unique approach to spatial constructions of schools is crucially important. Reterritorialization and deterritorialization, or the varying flows of people and capital across space and time, are highlighted to understand spatial forces operating on such things as schools, communities, people, and culture. Authors from multiple fields of study contribute to this book's examination of how social, political, and historical dimensions of spatial forces, especially racial, ethnic, and other markers of difference, are shaped by processes and outcomes of school reform.

Cyclescapes of the Unequal City John G. Stehlin, 2019-10-01 A critical look at the political economy of urban bicycle infrastructure in the United States. Not long ago, bicycling in the city was considered a radical statement or a last resort, and few cyclists braved the inhospitable streets of most American cities. Today, however, the urban cyclist represents progress, and the urban renaissance. City leaders now undertake ambitious new bicycle infrastructure plans and bike share schemes to promote the environmental, social, and economic health of the city and its residents. *Cyclescapes of the Unequal City* contextualizes and critically examines this new wave of bicycling in American cities, exploring how bicycle infrastructure planning has become a key symbol of and site of conflict over uneven urban development. John G. Stehlin traces bicycling's rise in popularity as a key policy solution for American cities facing the environmental, economic, and social contradictions of the previous century of sprawl. Using in-depth case studies from San Francisco, Philadelphia, and Detroit, he argues that the mission of bicycle advocacy has converged with and reshaped the urban growth machine around a model of livable, environmentally friendly, and innovation-based urban capitalism. While advocates envision a more sustainable city for all, the deployment of bicycle infrastructure within the framework of the neoliberal city, in many ways, intensifies divisions along lines of race, class, and space. *Cyclescapes of the Unequal City* speaks to a growing interest in bicycling as an urban economic and environmental strategy, its role in the politics of gentrification, and efforts to build more diverse coalitions of bicycle advocates. Grounding its analysis in both regional political economy and neighborhood-based ethnography, this book ultimately uses the bicycle as a lens to view major shifts in today's American city.

Opdahl,2020-06-09 The Russian State and Russian Energy Companies analyses the development of relations between the state and five major energy companies and how this shaped Russia s foreign policy in the post Soviet region The book argues that the development of Russia s political economy mattered for foreign policy over the quarter of a century from 1992 to 2018 Energy companies roles in institutional development enabled them to influence foreign policy formation and they became available as tools to implement foreign policy The extent to which it happened for each company varied with their accessibility to the Russian state Institutional development increased state capacity in a way that strengthened Russia s political regime The book shows how the combined power of several companies in the gas oil electricity and nuclear energy industry was a key feature of Russian foreign policy both in bilateral relationships and in support of Russia s regional position

In this way Russia's energy resources were converted to regional influence. The book contributes to our understanding of Russia's political economy and its influence on foreign policy and of the formation of policy towards post-Soviet states.
