Geography Paper Memorandum

Gyanesh Kudaisya, Tan Tai Yong

Geography Paper Memorandum:

Educational Reconstruction Gary McCulloch, 2013-09-05 This book presents a clear overview of the debates that surrounded the making of the 1944 Act which affected every aspect of education in this country. It gives a detailed account of the tripartite divisions into three types of child that were sanctioned in the reforms of the 1940s. At the same time it also emphasises the idea of education as a civic project which underlay the reforms and which was such an important part of their lasting authority. The education policies of the past decade and the current attempts to shape a new education settlement need to be interpreted in a long term historical framework and in particular in relation to the aims and problems of the last great cycle of reform in the 1940s. This book makes an important contribution to the development of such a framework and the social history of education policy in this country.

The Aftermath of Partition in South Asia Gyanesh Kudaisya, Tan Tai Yong, 2004-03-01 This book draws upon new theoretical insights and fresh bodies of data to historically reappraise partition in the light of its long aftermath. It uses a comparative approach by viewing South Asia in its totality rather than looking at it in narrow national terms. As the first book to focus on the aftermath of partition it fills a distinctive niche in the study of contemporary South Asia.

The Development of the Secondary Curriculum Michael H. Price, 2018-10-03 Originally published in 1986 This book's focus is on English secondary schooling in the late 19th and 20th Centuries during which the definition of a general secondary education was itself negotiated and consolidated before the development of secondary modern and then comprehensive schools. In each chapter a specialist contributor considers the changing ideology, shape and status of one of the seven traditional academic subjects namely Classics, Modern Languages, English, History, Geography, Mathematics and Science. These seven school subjects have dominated the academic school curriculum since the nineteenth century and continue to exert a powerful influence upon the contemporary school curriculum today despite the emergence of various rivals and the growing status of practical subjects.
