The Geography of Uzbekistan Lola Gulyamova, 2022-12-02 This book describes the geography of Uzbekistan and its unique history and culture. It focuses on the development of Uzbekistan as a result of its location on the crossroads of the Silk Road. The influence of global and regional environmental challenges on the current landscape and similar issues are discussed and analyzed from a historical perspective. Contemporary tensions and reforms in social, economical and cultural life are described with the aim to draw a picture of modern paths to transformation and development. The Geography of Uzbekistan includes also information on geology, nature and natural resources in particular water. The book discusses the social and environmental impacts of the Aral Sea disaster and shows new paths of transformation and development for this Central Asian country.

Dislocating the Orient Daniel Foliard, 2017-04-13 While the twentieth century's conflicting visions and exploitation of the Middle East are well documented, the origins of the concept of the Middle East itself have been largely ignored. With *Dislocating the Orient*, Daniel Foliard tells the story of how the land was brought into being, exploring how maps, knowledge and blind ignorance all participated in the construction of this imagined region. Foliard vividly illustrates how the British first defined the Middle East as a geopolitical and cartographic region in the nineteenth and early twentieth centuries through their imperial maps. Until then, the region had never been clearly distinguished from the East or the Orient. In the course of their colonial activities, however, the British began to conceive of the Middle East as a separate and distinct part of the world, with consequences that continue to be felt today. As they reimagined boundaries, the British produced disputed and finally dramatically transformed the geography of the area, both culturally and physically, over the course of their colonial era. Using a wide variety of primary texts and historical maps to show how the idea of the Middle East came into being, *Dislocating the Orient* will interest historians of the Middle East, the British empire, cultural geography and cartography.

After Piketty Heather Boushey, J. Bradford DeLong, Marshall Steinbaum, 2017-05-08 Are Thomas Piketty's analyses of inequality on target? Where should researchers go from here in exploring the ideas he pushed to the forefront of global conversation? In *After Piketty*, a cast of economists and other social scientists tackle these questions in dialogue with Piketty in what is sure to be a much debated book in its own right.

The History of Educational Measurement Brian E. Clauser, Michael B. Bunch, 2021-07-07 The *History of Educational Measurement* collects essays on the most important topics in educational testing, measurement and psychometrics. Authored by the field's top scholars, this book offers unique historical viewpoints from origins to modern applications of formal testing programs and mental measurement theories. Topics as varied as large scale testing, validity, item response theory, federal involvement and notable assessment controversies complete a survey of the field's greatest challenges and most important achievements. Graduate students, researchers, industry professionals and other stakeholders will find this volume relevant for years to come.
