Directions: Watch the Crash Course episode using the hypothesis above to answer the questions below. Remember John tells you you may need to use the playback setting to slow this down to 75% or 50%.

1. **What were some changes occurring in how people perceived the everyday world during the seventeenth century? Refer to John's examples of earthquakes in the lesson.**

Answer: During the seventeenth century people began to perceive the everyday world differently by linking natural phenomena, such as earthquakes and eclipses, with human events. They believed in the influence of superstitions and saw these events as portents or punishments from God such as the biblical earthquakes. However, by the late seventeenth century this belief had mutated into an evolution by the great French Voltaire.

2. **What aspects of everyday life did the Enlightenment focus on, besides scientific and mathematical theories?**

Answer: The Enlightenment focused on aspects of everyday life beyond scientific and mathematical theories. It explored social relationships, trade and manufacturing, and the relationship between ordinary people and their governments.

3. **What is the Enlightenment or Age of Light? What was its main belief?**

The Enlightenment, also known as the Age of Light, was a period characterized by the belief that traditional ideas and institutions needed to be examined through rational investigation. Its main belief was that reason should be used to challenge and evaluate existing beliefs and practices.

4. **What were some of the new commodities that were introduced to Europe during this period?**

Answer: New commodities introduced to Europe during this period included coffee, tea, chocolate, and tobacco. These goods led to experimentation and changes in daily life and social interactions.

5. **How did the cultivation of new foods from the Americas contribute to a change in the perception of available calories and the possibility of avoiding famine?**

Answer: The cultivation of new foods from the Americas, such as potatoes and corn, increased available calories and challenged the perception that Europe was constantly on the brink of famine. It reinforced the idea that food scarcity could be overcome and contributed to a shift in population.

6. **What did European travelers discover about social orders in other parts of the world?**

Answer: European travelers discovered that social orders in other parts of the world were less spontaneous and hierarchical compared to European societies. They observed societies that valued individual skills and talents over lineage and use alternative ways of organizing social structures.

7. **Who was Montesquieu, and what did he criticize through his writings?**

Answer: Montesquieu, also known as Charles-Louis de Secondat, Baron de La Brède et de Montesquieu, criticized entrenched ways of life through his writings. He used satire and humor to criticize religious practices, social orders, and the abuse of power by rulers.
