

The Scientific Revolution: Astronomy

In the A.D. 150s, the astronomer Ptolemy stated that Earth was the center of the universe. The sun and the planets, according to Ptolemy, moved around Earth. Ptolemy's theory is called the **geocentric**, or "Earth-centered," theory. The Greek word for Earth is *geo*. People believed this theory for many centuries.

TASK:

1. Who was Ptolemy? What was his theory?
2. Why do you think people believed in the geocentric theory?
3. Using the materials available to you, create the Geocentric Theory.

COPERNICUS

During the early 1500s, Polish scientist Nicolaus Copernicus began to abandon Ptolemy's geocentric theory (earth-centered theory). Instead, he argued that the sun was the center of the universe. Copernicus developed the **heliocentric**, or "sun-centered," theory. *Helio* is the Greek word meaning "sun". Copernicus realized that his theory explained many of the then-known facts about astronomy.

When Copernicus's theory was published in 1543, people paid little attention. The theory seemed to deny what people's senses told them. Anyone could "see" that the sun and planets moved around the Earth. Anyone could "feel" that solid Earth did not move.

NICOLAUS COPERNICUS

Nicolaus Copernicus, the great Polish scientist, is viewed today as the founder of modern astronomy. His heliocentric theory demonstrated that the earth is a moving planet and that it revolves around the sun. Copernicus became a symbol of the new ideas and approaches that brought about the Scientific Revolution.

Copernicus had neither the instruments nor the mathematics to prove his theory. Proof came later with the work of two other scientists.

QUESTIONS:

1. WHAT DID COPERNICUS ARGUE?
2. WHY DO YOU THINK PEOPLE DID NOT ACCEPT COPERNICUS' MODEL, BACK THEN?
3. HOW DID COPERNICUS CHALLENGE TRADITIONAL THOUGHT?
4. TASK: Using the materials provided create the Heliocentric model.
