A number of the key figures in the new edition are revised to provide a more inviting and informative treatment. The figures are broken into component parts with supporting commentary so that they can more readily see the key ideas. Material from The Flying Circus is incorporated into the chapter opener, puzzlers, sample problems, examples, and end of chapter problems to make the subject more engaging. Checkpoints enable them to check their understanding of a question with some reasoning based on the narrative or sample problem they just read. Sample Problems also demonstrate how engineers can solve problems with reasoned solutions. Terra Nova Eric W. Sanderson, 2013-06-04 A look at what the American lifestyle has done to the environment and how to move toward a better future. In the last century three powerful forces: oil, cars, and suburbs buoyed the American dream. Yet now the quality of life in the United States is declining due to these same three forces. Our dependence on oil is a root cause of wars, recessions, and natural disasters. Cars consume an outsized share of our incomes and force us to squander time in traffic. Meanwhile expensive sprawl, outbursts devour farmland and in a vicious cycle further entrench our reliance on cars and oil. In Terra Nova conservation ecologist Eric W. Sanderson, the national bestselling author of Mannahatta, offers concrete steps toward a solution. He delves into natural history, architecture, chemistry, and politics to show how the American relationship to nature has shaped our past and how it can affect our future. Illustrated throughout with maps, charts, and infographics, Terra Nova demonstrates that it is indeed possible to achieve a better world. Sanderson commendably outlines a new way of life designed to sustain American prosperity, health, and freedom for generations to come.
