

3 Description of the Microlab STAR

3.1 The Standard Microlab STAR

STAR stands for Sequential Transfer and Aliquoting Robot. The Microlab STAR performs pipetting operations on liquids in containers placed on its work surface.

The basic model Microlab STAR contains a work surface, called a deck, for placing movable carriers. These carriers hold reagent containers, such as tubes, microtiter plates, or other kinds of labware.

The Microlab STAR

The Microlab STAR's deck is divided into 54 equal tracks (T) for loading carriers with predetermined positions. This obviates the need for precise measurement of positions. The deck has partitions for a maximum of 54 specialised 1-T carriers for sample tubes, or a maximum of 9 6-T carriers for microtiter plates and CO-RE tips. An additional partition space is provided for the tip waste container.
