liberalism and constructivism Going forward research in this book also explores the development of key regional affairs Maritime security and space security are two of major security related affairs in which the states in East Asia and the Asia Pacific have to engage including the development of the TPP TPP 11 and RCEP as well as infrastructure development and development cooperation which are crucial in relation to China's initiatives in the BRI and AIIB Lastly the book provides valuable references to regionalism in East Asia and the Asia Pacific by analyzing regional integration cooperation through free trade agreements and the development of regional connectivity This includes the evolution of cooperation and conflict within key regional frameworks such as the East Asia Summit and APEC as well as key regional visions such as the Free and Open Indo Pacific It also takes into account the possible influence of ideational factors such as norms principles and rules on the development of regional cooperation

Rights of Individuals in an Earth Observation and Satellite Navigation Environment Arianna Vettorel, 2023-11-13 New Space technologies Earth observation and satellite navigation in particular have proven to be invaluable drivers of sustainable development thus contributing to the protection of several human rights the Good At the same time however New Space technologies raise concerns for the right to privacy the Bad and face a number of challenges posed by hostile cyber operations the Ugly Dr Arianna Vettorel analyzes the relevant international European and domestic legal frameworks and highlights the need for several innovative approaches and reforms in a transnational and bottom up perspective in order to maximize the Good and minimize the Bad and the Ugly of New Space technologies

Protecting the Last Frontier Gabrielle Leterre, 2024-04-29 Aerospace Law and Policy Series Space resource activities better known as space mining is the next step in humankind's utilization of outer space Previous space activities have belatedly caused us to realize that fragile environments do not end with Earth's atmosphere Today the most striking problem is the agglomeration and increasing generation of nonfunctional space objects space debris in orbit Tomorrow with the development of new space activities unanticipated environmental problems will arise beyond Earth orbit This book seeks to anticipate the inevitable legal framework that will need to be put in place and in particular considers the necessity to create legal standards to support the environmental sustainability of space resource activities To that end the book assesses the efficiency of existing space law in addressing environmental threats and reflects on the potential contribution international environmental law can offer The array of applicable mechanisms considered includes a detailed examination of the following what kind of environmental problems may arise from space resource activities which norms of international law are relevant in addressing these threats within the framework of sustainability the United Nations Space Treaties domestic space legislations that directly address space resource activities or that are particularly significant from an environmental perspective and soft law especially instruments and guidelines from international organizations acting in the space sector such as the United Nations Committee on the Peaceful Uses of Outer Space COPUOS and the Committee on Space Research COSPAR Contrary to a common idea space resources such as the ones found in situ on celestial bodies are

limited and need to be managed rationally It is indubitable that activities beyond Earth orbit will have an impact on the surrounding environment raising a host of potential issues which go beyond the question of debris such as contamination and the risk of overexploitation Ultimately this book drafts the roadmap for the environmentally sustainable exploitation of space resources from a legal standpoint and proposes a sustainability framework articulated around a set of standards Concerned lawyers and policymakers worldwide will greatly appreciate the book s set of objective standards and concrete measures This practical approach which includes the comprehensive review of instruments governing space activities will lead them to navigate with assurance the different normative levels of legal action for astro environmentalism
