## Hoops By Walter Dean Myers Chapter Summaries:

**Walter Dean Myers** Richard Andersen, 2014-01-01 Walter Dean Myers wrote more than one hundred books for young adults. He won the Coretta Scott King Award for African American and served as the U.S. National Ambassador for Young People's Literature. This biography delves into the inspirational life of Myers and exposes the hardships he overcame to become one of the most regarded children's book authors in our lifetime. Through this book, readers will gain a deep insight into this influential author's work and how Myers fought for more African American authors of young adult fiction to be recognized.

**Walter Dean Myers** Elizabeth Hoover, 2014-01-30 Walter Dean Myers was a prolific author penning over one hundred young adult and children's books. According to the American Library Association, Myers won the Coretta Scott King Book Award six times. This informative edition covers the life of author Walter Dean Myers. The book spans Myers' troubled childhood in Harlem through his rise as an editor at a publishing house and finally delves into his work as an author. Readers will learn about how Myers overcame racism and learning disabilities to become an award-winning author.

Young Adult Literature and Culture Harry Eiss, 2009-03-26 This book offers a multifaceted approach to the world of young adults, everything from Ray Schrock's use of Walter Dean Myers' sports stories to discuss race relations and cultural politics to Joyce Litton's analysis of the highly popular Sisterhood of the Traveling Pants Quartet. The cover illustration is done by Joel Rudinger based on his experiences with the Inuit where he learned many of their legends and myths, resulting in his own excellent work on Sedna, the creation goddess, a story filled with deep tragedy, mystery, and the world of the spirits. This mythic world slides into the discussion of Harry Eiss' one that focuses on The Isis Trilogy, best known of Monica Hughes' many works who writes science fiction and fantasy. In particular, they are valid carriers of myth for the 20th century and most especially for young people. Margaret Best and Susann deVries also give us literature that uses science. They begin: The science fair project is the central metaphor and the reality in Paul Zindel's *The Effect of Gamma Rays on Man in the Moon Marigolds* (1970). Christopher Paul Curtis's *Bucking the Sarge* (2004) and Joyce Maynard's *The Cloud Chamber* (2005). After providing an overview of science fiction, Sally Sugarman offers a study of the entire genre. For this study, two hundred and thirty-nine high school students from two schools in Vermont and Massachusetts were surveyed. Alethea K. Helbig provides an overview of her important activities promoting literature for the young. She was a seminal scholar and educator when colleges and universities were just beginning to take the study of such literature seriously when English departments were initiating serious undergraduate and graduate classes in what previously had been seen as inferior literature. Her life itself provides us with an entertaining and historically valuable autobiographical account of a person at the center of the change that has taken and continues to take place. Jerry Loving expands the horizons of the entire collection of essays, providing a firsthand account of how the young are educated in China, including a detailed history. It begins: I have been traveling to mainland China at least 4 to 6 times a year as a teacher or education evaluator since 2002. As the visits and years passed, I watched the education

system of China slowly improve to the level my schools were like when I went to school in the 50 s and 60 s      *Walter Dean Myers* Denise M. *Childhood and Innocence in American Culture* James M. Curtis,2023-08-01 This collection argues that the romanticized conflation of childhood and innocence in American culture has been on a steady decline at least since the 1960s largely due to postmodern critiques of overarching narratives involving both the child and the innocence of childhood Additionally this collection highlights and analyzes examples of children s literature and culture throughout the 20th century and into the 21st which pointedly defy traditional idealized notions of childhood Such an analysis serves to reiterate the idea that the romanticized notion of childhood which has pervaded American culture for over two centuries is little more than a cultural

construction that bears little to no resemblance to the actual lived experience of American children

*Book Banning in 21st-Century America* Emily J. M. Knox, 2015-01-16 Requests for the removal relocation and restriction of books also known as challenges occur with some frequency in the United States Book Banning in 21st Century American Libraries based on thirteen contemporary book challenge cases in schools and public libraries across the United States argues that understanding contemporary reading practices especially interpretive strategies is vital to understanding why people attempt to censor books in schools and public libraries Previous research on censorship tends to focus on legal frameworks centered on Supreme Court cases historical case studies and bibliographies of texts that are targeted for removal or relocation and is often concerned with how censorship occurs The current project on the other hand is focused on the why of censorship and posits that many censorship behaviors and practices such as challenging books are intimately tied to the how one understands the practice of reading and its effects on character development and behavior It discusses reading as a social practice that has changed over time and encompasses different physical modalities and interpretive strategies In order to understand why people challenge books it presents a model of how the practice of reading is understood by challengers including what it means to read a text and especially how one constructs the idea of appropriate reading materials The book is based on three different kinds sources The first consists of documents including requests for reconsideration and letters obtained via Freedom of Information Act requests to governing bodies produced in the course of challenge cases Recordings of book challenge public hearings constitute the second source of data Finally the third source of data is interviews with challengers themselves The book offers a model of the reading practices of challengers It demonstrates that challengers are particularly influenced by what might be called a literal common sense orientation to text wherein there is little room for polysemic interpretation multiple meanings for text That is the meaning of texts is always clear and there is only one avenue for interpretation This common sense interpretive strategy is coupled with what Cathy Davidson calls undisciplined imagination wherein the reader is unable to maintain distance between the events in a text and his or her own response These reading practices broaden our understanding of why people attempt to censor books in public institutions
