Sea has from time immemorial been one of the world's most navigated spaces in the pursuit of trade pilgrimage and conquest Yet this multidimensional history remains largely unrevealed by its successive protagonists Intrigued by the absence of a holistic portrayal of this body of water and inspired by Fernand Braudel's famous work on the Mediterranean this book brings alive a dynamic Red Sea world across time revealing the particular features of a unique historical actor In capturing this heretofore lost space it also presents a critical conceptual history of the sea leading the reader into the heart of Eurocentrism The Sea it is shown is a vital element of the modern philosophy of history Alexis Wick is not satisfied with this inclusion of the Red Sea into history and attendant critique of Eurocentrism Contrapuntally he explores how the world and the sea were imagined differently before imperial European hegemony Searching for the lost space of Ottoman visions of the sea The Red Sea makes a deeper argument about the discipline of history and the historian's craft

Climate Displacement Jamie Draper, 2023-11-07 Climate change is reshaping patterns of displacement around the world Extreme weather events destroy homes environmental degradation threatens the viability of livelihoods sea level rise and coastal erosion force communities to relocate and risks to food and resource security magnify the sources of political instability Climate displacement the displacement of people driven at least in part by the impacts of climate change is a pressing moral challenge that is

incumbent upon us to address This book develops a political theory of climate displacement Most work on climate displacement has tended to take an idealized climate refugee as its focus But focusing on the figure of the climate refugee obscures the complexity and heterogeneity of climate displacement Instead this book takes the empirical dynamics of climate displacement as its starting point It examines the moral and political problems raised by the interaction of climate change and displacement in five domains community relocation territorial sovereignty labour migration refugee movement and internal displacement In each context climate displacement raises distinct questions which this book explores on their own terms At the same time this book treats climate displacement as a unified phenomenon by examining the overarching questions of responsibility and fairness that it raises The result is an empirically grounded political theory that both maps the conceptual terrain of climate displacement and charts a course for meeting the moral challenge that it raises **Snow,**

**Forest, Silence** Eero Tarasti, 1999-06-22 Thirty high level essays on various aspects of semiotics by Finnish Estonian and Hungarian scholars *Ecological Entanglements in the Anthropocene* Nicholas Holm, Sy Taffel, 2016-12-21 This edited collection explores the relationships between humans and nature at a time when the traditional sense of separation between human cultures and a natural wilderness is being eroded The Anthropocene whose literal translation is the Age of Man is one way of marking these planetary changes to the Earth system Global climate change and rising sea levels are two prominent examples of how nature can no longer be simply thought of as something outside and removed from humans and vice versa This collection applies the concepts of ecology and entanglement to address pressing political social and cultural issues surrounding human relationships with the nonhuman world in terms of working with nature It asks are there more or less preferable ways of working with nature What forms and practices might this work take and how do we distinguish between them Is the idea of nature even sufficient to approach such questions or do we need to reconsider using the term nature in favour of terms such as environments ecologies or the broad notion of the non human world How might we forge perspectives and enact practices which build resilience and community across species and spaces constructing relationships with nonhumans which go beyond discourses of pollution degradation and destruction Bringing together a range of contributors from across multiple academic disciplines activists and artists this book examines how these questions might help us understand and assess the different ways in which humans transform engage and interact with the nonhuman world

until after they occur Part of the answer according to Taleb is that humans are hardwired to learn specifics when they should be focused on generalities We concentrate on things we already know and time and time again fail to take into consideration what we don't know We are therefore unable to truly estimate opportunities too vulnerable to the impulse to simplify narrate and categorize and not open enough to rewarding those who can imagine the impossible **The Black Swan: Second Edition**

Nassim Nicholas Taleb, 2010-05-11 The most influential book of the past seventy five years a groundbreaking exploration of everything we know about what we don't know now with a new section called On Robustness and Fragility A black swan is a highly improbable event with three principal characteristics It is unpredictable it carries a massive impact and after the fact we concoct an explanation that makes it appear less random and more predictable than it was The astonishing success of Google was a black swan so was 9 11 For Nassim Nicholas Taleb black swans underlie almost everything about our world from the rise of religions to events in our own personal lives Why do we not acknowledge the phenomenon of black swans until after they occur Part of the answer according to Taleb is that humans are hardwired to learn specifics when they should be focused on generalities We concentrate on things we already know and time and time again fail to take into consideration what we don't know We are therefore unable to truly estimate opportunities too vulnerable to the impulse to simplify narrate and categorize and not open enough to rewarding those who can imagine the impossible For years Taleb has studied how we fool ourselves into thinking we know more than we actually do We restrict our thinking to the irrelevant and inconsequential while large events continue to surprise us and shape our world In this revelatory book Taleb will change the way you look at the world and this second edition features a new philosophical and empirical essay On Robustness and Fragility which offers tools to navigate and exploit a Black Swan world Taleb is a vastly entertaining writer with wit irreverence and unusual stories to tell He has a polymathic command of subjects ranging from cognitive science to business to probability theory Elegant startling and universal in its applications The Black Swan is a landmark book itself a black swan Liquid Architecture Pierangelo Marco Scravaglieri, 2023-12-22 Liquid Architecture challenges the idea of architecture as a fixed inert container and reconceptualises it as a body whose boundaries are rather blurred and ever changing This book moves away from form as the primary driver of spatial protocols and explores what the built environment might look like when viewed through the lenses of a wet ontology that is attentive to fluidity flows and territorial dynamism A reconfiguration of architectural materials and authorship is thus considered leading in turn to an exploration of the ethical dimensions of co designing with natural systems of various viscosities through liquid paradigms The book examines a set of principles for practice led discoveries that incorporate hybrid mixed media with the author's intersubjective relationship with liquid matter Drawing from qualitative based analytical investigation models the text allows comprehension of the liquid phenomena via material contextualisation of an ever becoming research setting Through a practical and theoretical engagement with the ontology of liquids the reader is exposed to a range of design led experiments

and creative propositions visualisation systems construction and testing of physical models that collectively translate into a series of novel insights for architectural agendas This book will be of interest to architecture and design research students and academics because it advocates the need for a more symbiotic and resilient approach to natural systems which could benefit from the integration of regenerating material flows into our buildings and urban settlements     **Incerto** NASSIM NICHOLAS. TALEB, 2021-05-04 The landmark five book series all together in one boxed set The Incerto is an investigation of opacity luck uncertainty probability human error risk and decision making when we don't understand the world expressed in the form of a personal essay with autobiographical sections stories parables and philosophical historical and scientific discussions in non overlapping volumes that can be accessed in any order The main thread is that while there is inordinate uncertainty about what is going on there is great certainty as to what one should do about it This boxed set includes FOOLED BY RANDOMNESS THE BLACK SWAN THE BED OF PROCRUSTES ANTIFRAGILE SKIN IN THE GAME
