ABSTRACT

Objective: This paper describes how and why to write a case report for publication in a peer-reviewed journal.

Methods: PubMed, the Cumulative Index to Nursing and Allied Health Literature (CINAHL), and the Index to Chiropractic Literature were searched from 2000 through September 2006 using the following search terms: case report, authorship, peer review, and manuscript. Relevant manuscripts were retrieved and the results were used to update a previous narrative overview of the literature.

Discussion: Commensurate with the increased use of evidence-based health care and recent changes in publication requirements, new standards are expected of case reports. Case reports should present new information to the literature and be written succinctly. The types of case reports available are discussed. Steps for preparing a case report are described based upon the current available literature.

Conclusion: Case reports are important contributions to the health sciences literature. Proper preparation of this study design is necessary in order for it to be published. A self-evaluation check sheet for authors is included to assist in the writing process. (*J Chiropr Med* 2006;5:72–82)

Key Indexing Terms: Case Report; Authorship; Peer Review; research; Manuscripts.

INTRODUCTION

The clinical case report, which describes and analyzes the diagnosis and/or management of 1 or 2 patients, is the first line of evidence in health care.^{1,2,3} Case reports have been used for years as a means to teach health sciences students,^{2,4} are one of the best ways for authors to get started in scholarly writing,^{2,5,6} and can be a valuable learning experience for both author and reader.⁷

As valuable as the case report might be, many journals no longer publish this study design for a variety

of reasons. Past abuses in authorship² culminated in the demise of the case report in some journals. Some journals no longer publish cases because of the low level of general application to the practice of evidence-based care since case reports have certain inherent limitations.^{2,8,9,10,11} Some cases add little to the body of scientific knowledge and this is cited as a reason for discontinuing the publishing of cases.¹² Other factors include the limited page space within a journal that tends to be dedicated to experimental studies, and the diminutive effect case reports have on a journal's impact factor.¹³ Thus,
