# Percentage and Calendar Functions

### Percentage Functions

The hp 12c platinum includes three keys for solving percentage problems:  $\boxed{\%}$ ,  $\boxed{\Delta\%}$ , and  $\boxed{\%T}$ . You don't need to convert percentages to their decimal equivalents; this is done automatically when you press any of these keys. Thus, 4% need not be changed to 0.04; you key it in the way you see and say it: 4 $\boxed{\%}$ .

### Percentages in RPN Mode

In RPN mode, to find the amount corresponding to a percentage of a number:

1. Key in the base number.
2. Press  $\boxed{\text{ENTER}}$ .
3. Key in the percentage.
4. Press  $\boxed{\%}$ .

For example, to find 14% of \$300:

| Keystrokes<br>(RPN mode) | Display |                                                                                                                                                        |
|--------------------------|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| 300                      | 300 .   | Keys in the base number.                                                                                                                               |
| $\boxed{\text{ENTER}}$   | 300 .00 | Pressing $\boxed{\text{ENTER}}$ separates the next number entered from the first number, just as when an ordinary arithmetic calculation is performed. |
| 14                       | 14 .    | Keys in the percentage.                                                                                                                                |
| $\boxed{\%}$             | 42 .00  | Calculates the amount.                                                                                                                                 |

If the base number is already in the display as a result of a previous calculation, you should not press  $\boxed{\text{ENTER}}$  before keying in the percentage — just as in a chain arithmetic calculation.
