The American Biology Teacher, 2003 *Digital Media, Youth, and Credibility* Miriam J. Metzger, Andrew J. Flanagin, 2008. The difficulties in determining the quality of information on the Internet, in particular the implications of wide access and questionable credibility for youth and learning. Today we have access to an almost inconceivably vast amount of information from sources that are increasingly portable, accessible and interactive. The Internet and the explosion of digital media content have made more information available from more sources to more people than at any other time in human history. This brings an infinite number of opportunities for learning, social connection and entertainment. But at the same time the origin of information, its quality and its veracity are often difficult to assess. This volume addresses the issue of credibility.

the objective and subjective components that make information believable in the contemporary media environment The contributors look particularly at youth audiences and experiences considering the implications of wide access and the questionable credibility of information for youth and learning They discuss such topics as the credibility of health information online how to teach credibility assessment and public policy solutions Much research has been done on credibility and new media but little of it focuses on users younger than college students Digital Media Youth and Credibility fills this gap in the literature Contributors Matthew S Eastin Gunther Eysenbach Brian Hilligoss Frances Jacobson Harris R David Lankes Soo Young Rieh S Shyam Sundar Fred W Weingarten *Encyclopedia of Information Technology Curriculum Integration* Tomei, Lawrence A.,2008-02-28 As more and more universities schools and corporate training organizations develop technology plans to ensure technology will directly benefit learning and achievement the demand is increasing for an all inclusive authoritative reference source on the infusion of technology into curriculums worldwide The Encyclopedia of Information Technology Curriculum Integration amasses a comprehensive resource of concepts methodologies models architectures applications enabling technologies and best practices for integrating technology into the curriculum at all levels of education Compiling 154 articles from over 125 of the world s leading experts on information technology this authoritative reference strives to supply innovative research aimed at improving academic achievement teaching and learning and the application of technology in schools and training environments
