unelected group fights to save the nation from terror and weapons of mass destruction while at the same time modifying and undermining the very essence of the country Many books are written about secrecy surveillance and government law breaking none so powerfully expose the truth of everyday life in this state of war

Catastrophic Incentives Jeff Schlegelmilch,Ellen Carlin,2023-10-03 Silver Award Winner 2024 Nonfiction Book Awards Societies are vulnerable to any number of potential disasters earthquakes hurricanes infectious diseases terrorist attacks and many others Even though the dangers are often clear there is a persistent pattern of inadequate preparation and a failure to learn from experience Before disasters institutions pay insufficient attention to risk in the aftermath even when the lack of preparation led to a flawed response the focus shifts to patching holes instead of addressing the underlying problems Examining twenty years of

disasters from 9 11 to COVID 19 Jeff Schlegelmilch and Ellen Carlin show how flawed incentive structures make the world more vulnerable when catastrophe strikes They explore how governments the private sector nonprofits and academia behave before during and after crises arguing that standard operational and business models have produced dysfunction Catastrophic Incentives reveals troubling patterns about what does and does not matter to the institutions that are responsible for dealing with disasters The short termism of electoral politics and corporate decision making the funding structure of nonprofits and the institutional dynamics shaping academic research have all contributed to a failure to build resilience Offering a comprehensive and incisive look at disaster governance Catastrophic Incentives provides timely recommendations for reimagining systems and institutions so that they are better equipped to manage twenty first century threats

Nomination of Peter R. Orszag United States. Congress. Senate. Committee on Homeland Security and Governmental Affairs, 2010

Disasters and the American State Patrick S. Roberts, 2013-10-28 Disasters and the American State offers a thesis about the trajectory of federal government involvement in preparing for disaster shaped by contingent events Politicians and bureaucrats claim credit for the government s successes in preparing for and responding to disaster and they are also blamed for failures outside of

government's control. New interventions have created precedents and established organizations and administrative cultures that accumulated over time and produced a general trend in which citizens, politicians, and bureaucrats expect the government to provide more security from more kinds of disasters. The trend reached its peak when the Federal Emergency Management Agency adopted the idea of preparing for all hazards as its mantra. Despite the rhetoric, however, the federal government's increasingly bold claims and heightened public expectations are disproportionate to the ability of the federal government to prevent or reduce the damage caused by disaster.

The Power of Communication Helio Fred Garcia, 2012

Communication is the absolutely indispensable leadership discipline. But too often, leaders and professional communicators get mired in tactics and fail to influence public attitudes in the ways that would help them the most. This book builds on the U.S. Marine Corps legendary publication *Warfighting*, showing how to apply the Corps' proven leadership and strategy doctrine to all forms of public communication. The author reveals how to orient on audiences, recognizing their centers of gravity and most critical concerns. He also teaches how to integrate and succeed with all three levels of communication: strategic, operational, and tactical. He shows how to take the initiative and control the agenda, respond to events with speed and focus, use the power of maneuver, prepare and plan, and put it all together in order to become a habitually strategic communicator.
