The Korean Automotive Industry, Volume 2 A.J. Jacobs, 2023-08-24 This volume chronicles the maturation of the South Korean auto industry and its native automakers from the 1997 Asian Crisis to 2019 After examining the context for domestic vehicle production in South Korea the author presents multiple case studies for all five Korean automakers General Motors Korea Daewoo Motors Kia Hyundai Ssangyong and Renault Samsung This includes coverage of Hyundai Kia s foreign plants in North America Europe India China and Emerging Asia The book closes by assessing the five to ten year future outlooks for Korean automakers at home and abroad This important work will prove informative to scholars of business management automotive history international development Asian studies and public administration      **Aiming Big with Small Cars** Rajnish Tiwari, Cornelius Herstatt, 2013-10-28 This book focuses on the small car segment of India s automotive industry to explain the emergence of lead markets The authors contend that the current understanding of lead markets does not sufficiently explain the business practices that are born out of the intensified globalization of innovation Lead markets are considered crucial for the global diffusion of new products and this book investigates whether sustainable lead markets can also emerge in developing economies and if so under which conditions The authors question the conventional wisdom and propose updates and extensions to the lead market theory to better reflect the changing ground realities on ground      Don't Tell the Boss! Dmitry Chernov, Didier Sornette, Giovanni Sansavini, Ali Ayoub, 2023-01-20 After a major disaster when investigators are piecing together the story of what happened a striking fact often emerges before disaster struck some people in the organization involved were aware of dangerous conditions that had the potential to escalate to a critical level But for a variety of reasons this crucial information did not reach decision makers So the organization moved ever closer to catastrophe effectively unaware of the possible threat despite the fact that some of its employees could see it coming What is the problem with communication about risk in an organization and why does this problem exist What stops people in organizations or project teams from freely reporting and discussing critical risks This book seeks to answer these questions starting from a deep analysis of 20 disasters where the concealment of risks played a major part These case studies are drawn from around the world and span a range of industries civil nuclear power coal oil and gas production hydropower energy metals and mining space exploration transport finance retail manufacturing and even the response of governments to wars famines and epidemics Together case studies give an insight into why people hesitate to report risks and even when they do why their superiors often prefer to ignore the news The book reviews existing research on the challenges of voice and silence in organizations This helps to explain more generally why people dread passing on bad news to others and why in the workplace they prefer to keep quiet about unpleasant facts or potential risks when they are talking to superiors and colleagues The discussion section of the book includes important examples of concealment within the Chinese state hierarchy as well as by leading epidemiologists and governments in the West during the novel coronavirus outbreak in Wuhan in 2019
