Bishop, Hazel Tan, Tasos N Barkatsas, 2014-09-20 This book presents a research focus on diversity and inclusivity in mathematics education The challenge of diversity largely in terms of student profiles or contextual features is endemic in mathematics education and is often argued to require differentiation as a response Typically different curricula text materials task structures or pedagogies are favoured responses but huge differences in achievement still result If we in mathematics education seek to challenge that status quo more research must be focussed not just on diversity but also on the inclusivity of practices in mathematics education The book is written by a group of experienced collaborating researchers who share this focus It is written for researchers research students teachers and in service professionals who recognise both the challenges but also the opportunities of creating and evaluating new inclusive approaches to curriculum and pedagogy ones that take for granted the positive values of diversity Several chapters report new research in this direction The authors are part of or have visited with the mathematics education staff of the Faculty of Education at Monash University in Melbourne Australia The chapters all focus on the ideas of development in both research and practice recognising that the current need is for new inclusive approaches The studies presented are set in different contexts including Australia China the United States and Singapore

Teaching STEM in the Secondary School Frank Banks, David Barlex, 2014-07-17 The skills knowledge and understanding of the subjects involved in STEM Science Technology Engineering and Mathematics are vital for all young people in an increasingly science and technology driven society This book looks at the purpose and pedagogy of STEM teaching and explores the ways in which STEM subjects can interact in the curriculum to enhance student understanding achievement and motivation By reaching outside their own classroom teachers can collaborate across subjects to enrich learning and help students relate school science technology and maths to the wider world Packed with ideas and practical details for teachers of STEM subjects this book considers what the STEM subjects contribute separately to the curriculum and how they relate to each other in the wider education of secondary school students describes and evaluates different curriculum models for STEM suggests ways in which a critical approach to the pedagogy of the classroom laboratory and workshop can support STEM for all students addresses the practicalities of introducing organising and sustaining STEM related activities in the secondary school looks to ways schools can manage and sustain STEM approaches in the long term This timely new text is essential reading for trainee and practising teachers who wish to make the learning of Science Technology Engineering and

Mathematics an interesting motivating and exciting experience for their students **Chinese Students in UK Further Education** Rosemary A. Reynolds, 2017-12-15 Chinese students in the UK have been increasing in number for many years yet competition from other Western educators and increasing investment in China's own education system has led to concern that UK institutions may soon see a decline in their market share Dr Reynolds addresses this issue in *Chinese Students in UK Further Education* by attempting to understand students' experiences from their perspective Beginning with an exploration of why these students choose to come and study in the UK and why they are coming at younger ages the book goes on to discuss topics such as risk technology and diversity in order to understand which factors have the greatest influence on where they choose to study and whether they choose to remain at an institution Drawing on data from two different education institutions providers of GCSE A level programmes for students aged 16-18 years Dr Reynolds attempts to understand what these students experience during their studies how they manage new social relationships and whether upon course completion they achieved the results they desired at the outset Moreover the book aims to ascertain whether the students feel in hindsight that the decision to risk investing in UK further education was right and what they might communicate about UK study to contacts in China and elsewhere The book examines what further education institutions do well and where they might improve to help develop Chinese students' educational experiences As such it will be essential reading for academics researchers and postgraduates in the fields of further education sociology of education international and intercultural education and mobility studies Toward Mathematics for All Nerida Ellerton, M. A. (Ken) Clements, 2022-06-27 This book presents a history of mathematics between 1607 and 1865 in that part of mainland North America which is north of Mexico but excludes the present day Canada and Alaska Unlike most other histories of mathematics now available the emphasis is on the gradual emergence of mathematics for all programs and associated changes in thinking which drove this emergence The book takes account of changing ideas about intended implemented and attained mathematics curricula for learners of all ages It also pays attention to the mathematics itself and to how it was taught and learned *Econometrics of Risk* Van-Nam Huynh, Vladik Kreinovich, Songsak Sriboonchitta, Komsan Suriya, 2014-12-15 This edited book contains several state of the art papers devoted to econometrics of risk Some papers provide theoretical analysis of the corresponding mathematical statistical computational and economical models Other papers describe applications of the novel risk related econometric techniques to real life economic situations The book presents new methods developed just recently in particular methods using non Gaussian heavy tailed distributions methods using non Gaussian copulas to properly take into account dependence between different quantities methods taking into account imprecise fuzzy expert knowledge and many other innovative techniques This versatile volume helps practitioners to learn how to apply new techniques of econometrics of risk and researchers to further improve the existing models and to come up with new ideas on how to best take into account economic risks *Systemic Risk and Reinsurance* Weidong

Tian,2020-07-01 This Special Issue covers the topic of timely vital risk management systemic risk from many important perspectives It includes novel and scientific approaches from the network with topological indicators on systemic risk community analysis of the global financial system welfare analysis of capital insurance and the impact of capital requirement risk measures and optimal portfolio and optimal reinsurance under risk constraint Most articles study the financial sector and insurance companies after the financial crisis of 2008 2009 circa ten years prior The COVID 19 global pandemic in 2020 has caused similar or even greater challenges for the entire economy Therefore this Special Issue will be useful for anyone interested in systemic risk management
