particular understanding of place The book focuses on town planning from the late nineteenth century to the present day showing how the contemporary geography of Britain sharply unequal and marked by racial division continues ideologies of place established in colonial contexts Specifically planning allows for the speculative construction of future places that are both utopian in their ability to resolve political disagreement and at the same tantalizingly realizable able to be produced in concrete reality This speculative imaginary I argue is only possible within the ideological framework of colonialism and the history of empire within which it developed Topothesia refers to a rhetorical device employing the vivid depiction of an often imaginary place This device Vijay shows helps us understand urban planning as a narrative genre one that even in its most mundane documents is compelled to produce elaborate fantasies of future places The book examines specific planning movements over time to understand the form and the stakes of their speculative worlds In building these worlds the book shows planners continually coopted literary critiques of the present and reveries of the future retaining literature's aesthetics while eschewing its politics At the same time Vijay shows writers and artists have dwelled within and against these colonial imaginaries to seek other means of representing place

Pollution Is Colonialism Max Liboiron, 2021-03-29 In *Pollution Is Colonialism* Max Liboiron presents a framework for understanding scientific research methods as practices that can align with or against colonialism They point out that even when researchers are working toward benevolent goals environmental science and activism are often premised on a colonial worldview and access to land Focusing on plastic pollution the book models an anticolonial scientific practice aligned with Indigenous particularly Māori concepts of land ethics and relations Liboiron draws on their work in the Civic Laboratory for Environmental Action Research CLEAR an anticolonial science laboratory in Newfoundland Canada to illuminate how pollution is not a symptom of capitalism but a violent enactment of colonial land relations that claim access to Indigenous land Liboiron's creative lively and passionate text refuses theories of pollution that make Indigenous land available for settler and colonial goals In this way their methodology demonstrates that anticolonial science is not only possible but is currently being practiced in ways that enact more ethical modes of being in the world
