British Medical Journal ,1911 **Essential Cases on the Limits of Liability** Bénédicte Winiger,Bjarte Askeland,Elena Bargelli,Martin Hogg,Ernst Karner,2024-11-04 European legal systems have developed a broad range of instruments aimed at limiting liability These instruments are systematically examined within the present volume which builds on the experience gathered in the various jurisdictions over the past decades and thereby fills a major gap in tort law literature The publication contains a selection of the most important cases from 27 states across Europe as well as decisions by European Union courts it also highlights cases from earlier periods of legal history For each case the facts and the relevant court decision are presented and accompanied by an analytical commentary In addition comparative analyses of the reported cases are provided and a special report is dedicated to how key cases would be resolved under model European rules on tort law The editors believe that the material gathered here may provide guidance for an organic convergence of the national legal systems in Europe It constitutes the basis of an *acquis commun* that is infinitely richer though also much more complex than the rather bland and abstract concepts contained in national codifications European legislation and modern model rules

Methodane Use and Abuse--1972-1973 United States. Congress. Senate. Judiciary,1973 **Medical Treatment of Children and the Law** Jo Bridgeman,2020-11-19 The high profile cases of Charlie Gard Alfie Evans and Tafida Raqeeb raised the questions as to why the state intrudes into the exercise of parental responsibility concerning the medical treatment of children and why parents may not be permitted to decide what is in the best interests of their child This book answers these questions It argues for a reframing of the law concerned with the medical treatment of children to one which better protects the welfare of the individual child within the context of family relationships recognising the duties which professionals have to care for the child and that the welfare of children is a matter of public interest protected through the

intervention of the state This book undertakes a rigorous critical analysis of the case law concerned with the provision of medical treatment to children since the first reported cases over forty years ago It argues that understanding of the cases only as disputes over the best interests of the child and judicial resolution thereof fails to recognise professional duties and public responsibilities for the welfare and protection of children that exist alongside parental responsibilities and which justify public or state intervention into family life and parental decision making Whilst the principles and approach of the court established in the early cases endure the nature and balance of these responsibilities to children in their care need to be understood in the changing social legal and political context in which they are exercised and enforced by the court The book will be a valuable resource for academics students and practitioners of Medical Law Healthcare Law Family Law Social Work Medicine Nursing and Bioethics
